

# THE EXPERIENCE

## TEG BUDDY PROGRAM

The buddy program is unique at TEG in the way that each intern is paired with a team member who was just recently in their shoes. This allows each intern to more easily acclimate to the work environment and gives them a valuable resource for questions, feedback and support. It can sometimes be daunting to ask questions or advice from others, but the buddy system allows each intern a single point of contact they can feel comfortable reaching out to.

-Josh Lytle, 2016 Intern

## HANDS ON EXPERIENCE

My internship at Trout, Ebersole & Groff, LLP (TEG), has given me hands-on experience with actual client work, and training projects. At the beginning of the internship, I lacked confidence in my work, but with the encouragement, and guidance from my TEG buddy I've not only learned how to apply the education I received at college but I've also become self-assured in my work.

-Tom Fitzgerald, 2017 Intern

## TEG AFTER HOURS

The Harrisburg Mile Corporate Challenge was a great team building experience. The race provided an opportunity for me to get to know other TEG professionals in an informal, fun setting.

-Nicole Best, 2017 Intern

The game of softball at TEG is a time-honored tradition. The life blood that reinvigorates the team and gives it a dash of youth each year are the interns. Some would say the interns are the most important piece of the team because of their enthusiasm, skill, and willingness to participate. We strive to offer a welcoming team environment to the interns by not intimidating them with too much skill.

-Sean Post, 2012 Intern

## Testimonial

“

I was one of TEG's first interns. During my internship at TEG, I enjoyed being in the field with clients. After my internship,

I was offered a full-time position and have since worked my way up to being a TEG Partner. I decided to stay at TEG after my internship because of the great experience I had and because of the company's culture.

-Krista Showers, CPA, Partner
