WE ARE EXPERTS IN CYBER SECURITY

VAMOS AL  
FUTURO

# OUR STORY

Sm4rt creates its first Security Operation Center (SOC) and offers Managed Services.

2011

A SOC with world-class features is installed, serving more than 300 customers.

2015

Sm4rt is renamed KIO Cyber Security.

2018

2004

Sm4rt is born as a company that provides ethical hacking services.

2013

Sm4rt is integrated with KIO Networks to complement technological solutions.

2017

Our second SOC is inaugurated.

2019

Another SOC in Querétaro is inaugurated as part of our growth

# WE GUARANTEE, SINCE TODAY, THE SECURITY OF YOUR COMPANY AGAINST THE CYBER-ATTACKS OF THE FUTURE.

- ▶ We are a leader in the market for IT security managed services.
- ▶ We have over 15 years of experience in the industry.
- ▶ We protect your IT infrastructure and your company's most valuable asset: your information.

We take your company to **the highest level of security**, saving time and resources.

# WE TAKE YOU TO THE FUTURE OF CYBERSECURITY

- ▶ We operate and manage services that ensure the continuity of your business.
- ▶ We use Artificial Intelligence to identify anomalies, risks, and signs of future threats.
- ▶ We safeguard the most important information so you can focus only on increasing the success of your company.
- ▶ Our team of experts is in charge of accompanying, advising and protecting you in security matters.

# HOW DO WE **REACT** TO SECURITY INCIDENTS?

**We face your biggest challenges, offering a solid, safe,  
and reliable future for your organization.**

Our services are operated  
with cutting-edge

**TECHNOLOGY.**

We have

**EXPERTS**

at your disposal, who are  
being trained continuously.

We have the latest generation

**INFRASTRUCTURE,**

the most robust, most modern and most  
secure in the region.

Our services are operated  
with cutting-edge  
**TECHNOLOGY.**

- Alliance with leading manufacturers in the Gartner quadrant (Perimetral, Core Systems, Endpoint Protection).
- Technology that improves efficiency and effectiveness.
- Platform Integration.
- Ticketing governance.
- Big data.
- Artificial Intelligence.\*

▸ SOC Querétaro\*

We have

**EXPERTS**

at your disposal, who are  
being trained continuously.

- +400 Computer Security Analysts
- +70 Dimensioning specialists
- +50 Technical professionals in fulfillment
- +40 Safety and Risk Experts

We have the latest generation  
**INFRASTRUCTURE;**  
the most robust, most  
modern, and safest in the  
region.

Our SOC (Security Operation Center) is operated within  
the **best Data Centers in the world** (TIER IV) and supported  
by **international standards:**

- ISO 20000
- ISO 27001
- ITIL-based SOC operation
- Incident Response
- Compliance
- Metrics to measure performance

WE OFFER YOU 3 SECURITY LEVELS:

---

**Preventive**  
Security

**Active** Security

**Proactive** Security  
(High Security)

# WE OFFER YOU 3 SECURITY LEVELS:

## Security Level I

### Preventive Security

We evaluate, analyze and identify threats that jeopardize the confidentiality, integrity, and availability of the critical elements of your company.

We build a personalized security strategy for your company.

We establish an information security government that manages potential risks, through controls and policies to comply with regulations and regulatory frameworks.

#### Customized services:

- Code review
- Cybersecurity compliance
- Application security tests
- Infrastructure penetration tests
- Cyber Check Up
- Cyber Shield
- Vulnerability management
- Cybersecurity consulting

#### Integral packages:

- CyberShield: insurance that supports you financially.
- Cyber Check Up: a deep diagnosis that detects your cyber vulnerabilities.

# WE OFFER YOU 3 SECURITY LEVELS:

## Security Level II

We manage and monitor your **computer network** to detect and contain threats.

We guarantee the **continuity of your operation**, monitoring 24 hours a day, 365 days a year.

Our **team of experts** will continuously monitor the security of your business.

## Active Security

### Customized services:

- Protection of mobile devices
- Email protection
- Investigation of cybersecurity incidents
- Cloud Protection for Web applications
- Perimeter protection
- Malware protection

### Integral packages:

- Security Network: Active monitoring solution that ensures your business against threats and attacks.

# WE OFFER YOU 3 SECURITY LEVELS:

## Security Level III

Our solutions against latent threats integrate a team of Cybersecurity experts who, with the help of **Artificial Intelligence**, protect your company's network.

### Personalized services:

- Threat Hunting: Artificial Intelligence to Predict Attacks

### Integral packages:

- Security Network MAX: Proactive solution to search for threats and ensures your business for the future.

● — **Proactive Security**  
(High Security)

We take preventive measures of protection, defense, and remediation.

Our experts are trained to **anticipate future attacks**, thanks to the predictive power of threat intelligence (Threat Intelligence & Threat Hunting).

WITH ARTIFICIAL INTELLIGENCE AND  
THREAT HUNTING WE ENSURE THE  
CONTINUITY OF YOUR BUSINESS

# SOC-SECURITY OPERATION CENTER

Your company's security lives here...

Our Operations Centers are specifically designed to monitor, prevent, identify and respond to cyber attacks that threaten your organization.
