- ☒ FITS ANY SKID STEER USING A 12X16.5 SIZE TIRE
- ☒ MADE FROM HIGH PERFORMANCE STRENX AND HARDOX STEELS
- ☒ EXCELLENT CLIMBING AND MANOEUVRABILITY

EW ORIGINAL SERIES

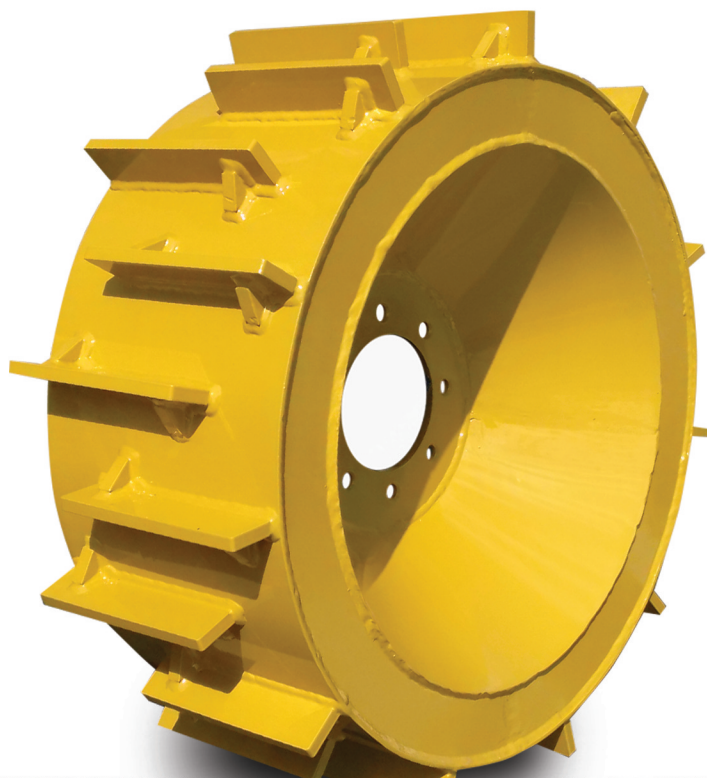

MADE FOR THE MOST SEVERE APPLICATIONS

The EW Original series was designed to meet the demanding needs of the forestry industry. Our rugged all in one steel design allows a customer to not worry about rubber tire or track damage in harsh tree cutting environments. Steel cleats made of Hardox materials allow for climbing and traversing stumps and rough terrain where you previously would never go with confidence.

Built in the most common 12X16.5 sized tire dimensions the EW Original series product fits the vast majority of skid steer loaders. An internal 60/40 offset means that it can be fit to your machine without the need for spacers and allows for bucket alignment the same as you would see with your standard tires and rim. With a staggered cleat pattern allowing for material cleanout you will notice increased traction even in muddy conditions.

If you have a severe application need, the EW Original was designed for you.

SPECIFICATIONS

Overall Diameter	Width	Weight	Shipping Weight	Bolt Hole Pattern	Offset	Cleat Depth	Cleat Width	Cleat Pattern
32.5	12.5	235 LB EACH	950 LB	Standard 6" Inner Hub, 8 Bolt	60/40	2"	9"	Staggered
