

# Fertrell Grape Recommendations

Fertilizer should be applied at the drip line of the branches. Applying at the drip line will cover the root system which is equal to the branches in size.

|                | January–March   | April–June  | July–September | October–December  |
|----------------|---|---|----------------|---|
| Grapes & Vines | <p><b>Super N 4-2-4</b> apply 2lbs per inch diameter in spring.</p> <p><b>Procidic</b> 6 oz/20 gallons of water in early spring if needed.</p> <p>Apply <b>Pure Spray Green (dormant oil)</b> in early spring if needed per directions below.</p> | <p><b>Pure Spray Green</b> mix 2.5-3.75 oz/gal of water — apply in early spring at first leaves after last hard frost.</p> <p><b>Fertrell Liquid #3 2-3-1/Bio-Hume</b> apply at full foliage and half fruit set per directions below.</p> |                | <p>Apply <b>Soil Mineralizer</b> at 2lbs per inch diameter.</p> <p>Apply <b>Regalia</b> 1 qt/50 gal of water after fruit set every 14-21 days discontinue after harvest</p> |

| Product Use Directions | <p><b>Pure Spray Green (dormant oil)/50:1</b> Pre-leaf or bud cover all exposed growth. For Insect control use 100:1 as needed.
