

Fertrell Organic Hops Production Recommendations

	Product	Application Rate
Fertilizer	Super N 4-2-4 with Zinc & Boron	Apply end of May-Early June <ul style="list-style-type: none"> ▪ Hops require N-P-K in a 2-1-2 ratio. Super N provides this in a time-released formula providing nutrients along with the micro nutrients needed for production. ▪ Hops also need adequate supply of Zinc and Boron to meet plant needs (must have a soil test for organics) Fertrell can also Custom Blend fertilizers based on your soil tests
	Fertrell Liquid Kelp	Foliar feed at 3-4 quarts per acre <ul style="list-style-type: none"> ▪ Fertrell Liquid Kelp helps to repel insects and improve plant health as well as contribute growth inhibitors, cytokines, and auxins.
Insect Control	Pyganic 5.0	0.5-1.0 oz. per gallon of water For control of Aphids and most soft-bodied insects
Disease Control	Procidic	0.25 oz. per gallon of water Improves plant health and lowers pH on leaf surface to combat disease
	Regalia	2-4 quarts per acre Stimulates plant immune system to be on the defense and increase the plant's ability to fight off diseases. Great for prevention.
