Fertrell Tree and Shrub Program

Established Trees and Shrubs

Early Spring
• Rake back mulch, spread Fertrell Holly Care 4-6-4: 1 lb per inch diameter of trunk at drip line.
• To avoid weeds in bed, add Fertrell Weed Ban: 20 lbs per 1000 sq. ft.
• Replace old mulch, water in with Fertrell Liquid #3 2-3-1: 1–2 oz per gal. Add a layer of new bark mulch for a total of about 3 inches (keep back from stem/trunk).

Early Fall
• Same as early spring (no Weed Ban).

Late Fall
• Apply Fertrell Soil Mineralizer: 10 lbs per 1000 sq. ft.

New Plantings

• Prepare planting hole, add ⅓ high-quality compost to the original soil, mix well, plant the shrub/tree at the proper depth, allowing for the mulch layer. After back filling, water in with Fertrell Liquid #3 2-3-1: 1–2 oz per gallon. After planting, top dress soil with Fertrell Holly Care 4-6-4: 1 lb per inch diameter of stem. Add bark mulch for a total of about 3 inches (keep back from stem/trunk).

• A soil test is recommended if soils are of unknown quality or have not been tested recently. A soil test is highly recommended for a large planting. Contact your Fertrell representative or the main office for a soil test kit.
