

Fertrell Tree and Shrub Program

Established Trees and Shrubs

Early Spring

- Rake back mulch, spread **Fertrell Holly Care 4-6-4**: 1 lb per inch diameter of trunk at drip line.
- To avoid weeds in bed, add **Fertrell Weed Ban**: 20 lbs per 1000 sq. ft.
- Replace old mulch, water in with **Fertrell Liquid #3 2-3-1**: 1-2 oz per gal. Add a layer of new bark mulch for a total of about 3 inches (keep back from stem/trunk).

Early Fall

- Same as early spring (no Weed Ban).

Late Fall

- Apply **Fertrell Soil Mineralizer**: 10 lbs per 1000 sq. ft.

	Holly Care 4-6-4	Weed Ban	Fertrell Liquid #3 2-3-1	Soil Mineralizer
Early Spring	1 lb per inch diameter of trunk	20 lbs per 1000 sq ft (if required)	1-2 oz per gallon	
Early Fall	1 lb per inch diameter of trunk	20 lbs per 1000 sq ft (if required)	1-2 oz per gallon	
Late Fall				10 lbs per 1000 sq ft

New Plantings

- Prepare planting hole, add 1/3 high-quality compost to the original soil, mix well, plant the shrub/tree at the proper depth, allowing for the mulch layer. After back filling, water in with **Fertrell Liquid #3 2-3-1**: 1-2 oz per gallon. After planting, top dress soil with **Fertrell Holly Care 4-6-4**: 1 lb per inch diameter of stem. Add bark mulch for a total of about 3 inches (keep back from stem/trunk).
- A soil test is recommended if soils are of unknown quality or have not been tested recently. A soil test is *highly* recommended for a large planting. Contact your Fertrell representative or the main office for a soil test kit.

	Fertrell Liquid #3 2-3-1	Holly Care 4-6-4
Planting	1-2 oz per gallon	
After Planting		1 lb per inch diameter of stem
