

# Cloud Insight

Optimize Your Cloud Performance and **Reduce Costs Up to 23%** with Personalized Insights and Recommendations.

## While convenient and useful, cloud computing poses major problems for IT and financial departments:

how do they track what the company is using and how do they determine whether these resources are being used efficiently? Anexinet Cloud Insights combines Anexinet's cloud management experience with industry leading products to help your business optimize your cloud infrastructure. Whether you require basic governance and reporting or turnkey cloud management with full PCI/DSS or HIPAA security monitoring, Anexinet Cloud Insights provides the individualized service you need. Anexinet's digital architects and cloud analysts engage with your IT and financial teams to continuously improve and streamline your cloud deployments.

## Anexinet Cloud Insights

### Cost

Reserved Instance Analysis and Resource Rightsizing allow you to hold individual departments and lines of business accountable for their cloud usage, while Automation Scheduling streamlines processes within your company.

### Security

Best Practices provide guidelines for customizing proactive policies that will continuously monitor for vulnerabilities in your cloud infrastructure and alert you with recommendations to rectify these weaknesses.

### Cost Governance

Cost Allocation reports explain exactly what you are paying for while Policies notify you when resources are created that got outside your budget.

### Visibility

Change Reporting and Utilization Monitoring give you ongoing visibility into all of your cloud infrastructure, allowing you to make effective business decisions.

Did you know Cloud Insights helped a leading manufacturing company gain visibility into their public cloud spend, enabling them to reduce the monthly cost of one of their most expensive projects by 38%?

# How It Works

During the initial consultation, an Anexinet cloud analyst is assigned to your account. A one-time configuration fee includes setting up access, establishing your governance policies, and creating perspectives for accurate reporting based on your business needs.

Receive weekly and monthly insight reports on compliance, governance, and cost breakdowns, so you have full visibility of your cloud resources.

Discuss findings and receive expert advisement from your Cloud Analyst monthly, so you can optimize cost, improve governance, and enhance security. Monthly service fees are based on your monthly cloud expenditures.
