

Extreme dexterity for extreme firefighting!

# Commander™

High-performance, comfortable and NFPA 1971-certified thermal hand protection that's always...ready for action!

## FEATURES & BENEFITS INCLUDE:

- **Greater Dexterity**  
Third-party test results show over 40% improvement for the Commander's dexterity rating (over the original version).
- **Increased Thermal Protection**  
The Commander's TPP results are above 60, far exceeding the NFPA 1971 standard.
- **Next-Generation CROSSTECH® Insert**  
It is fully bonded to a form-fitting thermal liner to create a 3D combination of thermal liner and moisture barrier. This results in better flexibility, less bulk in the palm and improved dexterity.
- **Modified Finger Crotches & Thumb**  
Designs typically used in 3D models have been incorporated to provide better fit and performance.
- **KOVENEX® Thermal Batt**  
The KOVENEX flame-resistant non-woven fabric delivers excellent TPP and radiant heat protection while enhancing dexterity, which eases doffing and donning, especially when wet. The fiber blend is also cut-resistant, tear-resistant and very "skin-friendly" – unique in FR materials.

Available  
in sizes:  
2XS to 4XL

(PRODUCT #LPG926BG)
