

# It's time to Power Your Drive, San Diego!

Bring EV charging to your property with a new SDG&E® Program

For a limited time, SDG&E® will install up to 3,500 EV charging stations at apartment buildings, condominiums and businesses throughout its service territory through the **Power Your Drive** program.

**Power Your Drive** allows you to offer advanced electric-vehicle charging to your current and prospective tenants and employees—at little or no cost to you.

**SDG&E** will pay for all fees associated with site planning, permitting, installation, hardware and software and cover all maintenance costs for the duration of the program. You'll pay a small one-time fee depending on the nature of your property.\*

These state-of-the-art charging stations come equipped with SKY™, the leading flexible, turnkey EV management solution from **Greenlots**. An approved solution provider of **SDG&E**, **Greenlots** offers an easy way to set up intelligent charging infrastructure for EVs at home or work that helps make the grid more efficient and saves consumers money.

## How the program works:

First, contact a **Greenlots** representative to help you complete the simple application for participation in the program.

Next, an **SDG&E** representative will call you to make sure you're eligible for the program. From there, we'll schedule a site visit to build a thorough site plan. Once you have approved the plan, **SDG&E** will move forward with permitting, installation and project completion.\*\*

**SDG&E** will own, operate and maintain the charging stations at no additional cost to you for the life of the program, including access to the SKY software platform for managing all of your charging needs.

### Benefits for Site Hosts

Installing EV charging stations through the **SDG&E Power Your Drive** program lets you add a high-demand amenity while positioning your company in a positive light and supporting the EV transformation:

- Retain current EV owners.
- Attract new EV owner tenants and employees.
- Low cost, no hassle—chargers are installed, owned, operated and maintained by **SDG&E**.
- Flexible billing options—choose to have **SDG&E** bill you or the driver.
- Demonstrate your commitment to cleaner air.
- No impact on your building's load—no needed panel upgrades or demand charges.

### Benefits for Fleet Operators

Fleet operators who join **Power Your Drive** gain visibility, flexibility and capability through the Greenlots fleet module:

- Drivers can charge anywhere on the SKY network.
- Advanced charging management provides fleet managers with real-time monitoring and charge usage reporting.
- Site hosts and EV owners get advanced load management capabilities.

## Why Choose Greenlots + Siemens

As an approved partner with **SDG&E**, **Greenlots** has partnered with **Siemens** to bring you the best combination of hardware and software to meet your needs.

- **Siemens** is a name you can trust, providing safe, reliable equipment for over 100 years.
- Get options for both wall-mounted and post-mounted stations to accommodate your needs.
- These state-of-the-art charging stations come equipped with the leading open-charging management solution, SKY™ from **Greenlots**. SKY makes it easy for building owners to offer advanced on-site charging to EV owners, featuring intuitive online experiences for site hosts and drivers and the ability to provide load-management capabilities.
- EV drivers can take advantage of the **Greenlots** mobile app for greater control, optimization and choice.
- Set preferences on the app to optimize charging for least cost.

## Register now to ensure priority consideration. Building owners must meet the following qualifications:

- **Apartments and condominiums:** Dedicate at least five parking spaces for EV charging stations.
- **Businesses:** Set aside at least 10 parking spaces for EV charging stations.
- Have an expected number of EV drivers that will use the stations.
- Agree to an easement for the charging facilities.
- Make a participation payment, as applicable.
- Agree to promote electric vehicles and usage of charging stations with employees and tenants, as applicable.

Hurry! Avoid the traffic jam and register ASAP. To learn more about **Power Your Drive** and how to ensure consideration for your business, visit the **Greenlots** website at [info.greenlots.com/pyd](http://info.greenlots.com/pyd)

\*Multifamily properties will be asked to install a minimum of five charging stations with a one-time participation fee of \$235 per station. Commercial sites will be asked to install a minimum of 10 charging stations with a one-time participation fee of \$630 per station.

\*\*Customer acceptance includes a signed easement and agreement to pay the participation fees as outlined above.
