

# Electrify America with Greenlots

greenlots

## No-cost charging stations for your workplace or multi-family building

Electrify America is investing \$2 billion over the next 10 years in Zero Emission Vehicle (ZEV) infrastructure in the United States. To enable millions of Americans to discover the joy, ease and benefits of electric driving, Electrify America plans to build a nationwide network of workplace, community and highway chargers that are convenient, accessible and reliable.

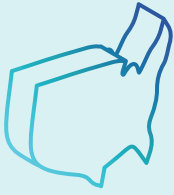

What's in it for you? If you are a property or business owner, Electrify America together with Greenlots, will provide free EV charging stations, which includes the design, installation and maintenance.

### A hassle-free approach to EV charging

- **Zero capital costs.** Electrify America will pay 100 percent of the upfront capital investment for the design and installation of new charging stations.
- **Installation covered.** Electrify America with Greenlots will provide turnkey installation and services from engineering and design to installation and commissioning.
- **No maintenance.** Electrify America with Greenlots will manage, maintain and operate the equipment and the network for the term of the agreement.
- **Future-proof technology.** You will receive the latest charging technology, with the opportunity to upgrade your equipment as the market evolves.
- **Stand out for good.** Having the latest EV charging stations at your facility will increase your competitive advantage by attracting and retaining electric vehicle drivers while helping you achieve your environmental goals.

# How it works

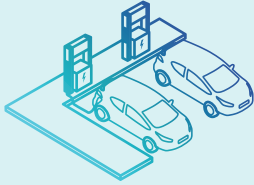

If you are a workplace or multi-unit dwelling.

And are located in specific census tract areas in  
**Southern California, Fresno, Sacramento, San Francisco, Boston, Seattle, Chicago, Philadelphia or New York.**

You may be eligible to have Electrify America and Greenlots install  
**1 to 10 charging stations**

At least  
**25** employees and  
**25** parking spaces

Sites must  
**not have prior allocated budgets** for EV charging. Electrify America will not displace projects with current funding.

## Get started in 5 easy steps

1

### Qualify site location

Email or call your Greenlots representative to tell us about your interest, type of building and location to see if your facility qualifies

2

### Site walk

Schedule a site walk to ensure your facility has adequate power infrastructure to support your charging stations

3

### Submit application

Greenlots will complete and submit your application to Electrify America

4

### Equipment & installation

If your site is approved, we will order the proper equipment and begin installation

5

### Commissioning

Greenlots will commission your charging stations and make them operable and visible on the SKY™ EV Charging Network

\*Final charging station installation and maintenance recipient will be determined solely by Electrify America. A signed site host agreement and completed site walk required to be considered a verified, awarded recipient.  
Site host agreements must be signed within 14 days of receipt to qualify.
