

Job Title: Funded R&D Product Manager

Reporting To: Board of Directors and CTO

Salary: Competitive compensation and benefits package based on experience

Location: arbnco Head Office, The Inovo Building, George St, Glasgow

Start Date: Immediate – apply with covering letter and CV to swest@arbnco.com

arbnco (www.arbnco.com) is looking for an experienced R&D Product Manager to lead on the optimisation of the many R&D grant funding opportunities in Scotland / UK and Europe as well as managing existing and 'pipeline' R&D funded projects.

In this senior and strategic role within the business the R&D Product Manager will become a key part of the core leadership team and will lead a small but dedicated team of R&D Project Managers consisting of both internal team members and external consultants and report directly to the Board of Directors and the CTO.

Responsibilities

- Achieve and maintain a technical level of knowledge of arbnco's applications and the commercial real estate sector.
- Achieve and maintain a technical level of knowledge about building simulation, its evolution, and offspring that may be used in other countries.
- Continuously review and report on the state of European Grant funding such as Horizon 2020 / Innovate UK and SMART.
- Function as a liaison and thought partner between the Leadership Team and various project work stream leaders to ensure the business needs have been met and are delivered on schedule. Address conflicts or issues as they arise, escalating as necessary, to overcome any obstacles
- Implement best practice Project Management tools to lead cross functional teams focused on product and process development.
- Responsible for product development coordination leading to the timely launch of new product initiatives.
- Provides critical thinking, helping to validate and link project objectives to the product line strategy.
- Own end to end success of the projects, ensuring accountability, execution of timelines, and continuous change management to deliver on-time, qualitative results.

Requirements

- Highly collaborative, focused manner.
- Excellent networking skills and the ability to communicate and interact at all levels, both internally and externally.
- Knowledge of or experience in the Energy / Commercial Real Estate Markets
- Experience / strong network in European Grant Funding sector.
- Strong research skills.
- Excellent written and verbal communication skills.
- Bachelor's degree in an engineering discipline or computer science with a Prince2, PMP, or equivalent project management certification.

About arbnco

arbnco offers a cloud-based software platform for delivering commercial real estate improvement analysis to determine retrofit strategies for mitigating risk and improving financial performance of commercial real estate by:

- Reducing risk associated with inefficient property within the context of climate change
- Improving asset investment performance, reduce operation costs and increase value
- Cost effectively generating strategic energy reduction scenarios
- Expediting and safeguarding transaction processes and open up site specific retrofit opportunities

arbnco is transforming the way commercial real estate looks at energy efficiency improvements. We started our journey in 2009 with an idea and a rented desk in central Scotland. Since then, we've grown into one of the leading software providers to the UK real estate market, working with some of the world's largest property investors.

Together with our clients and their customers, we're saving energy, saving money, and helping reduce carbon emissions.
