MEES and Section 63
reports

Easier reporting as
fully costed reports
are produced in
minutes

No licence fee – pay
when uploading
building

Increase your
revenues

Enhance Commercial
Real Estate
transactions

Overview of arbn consult

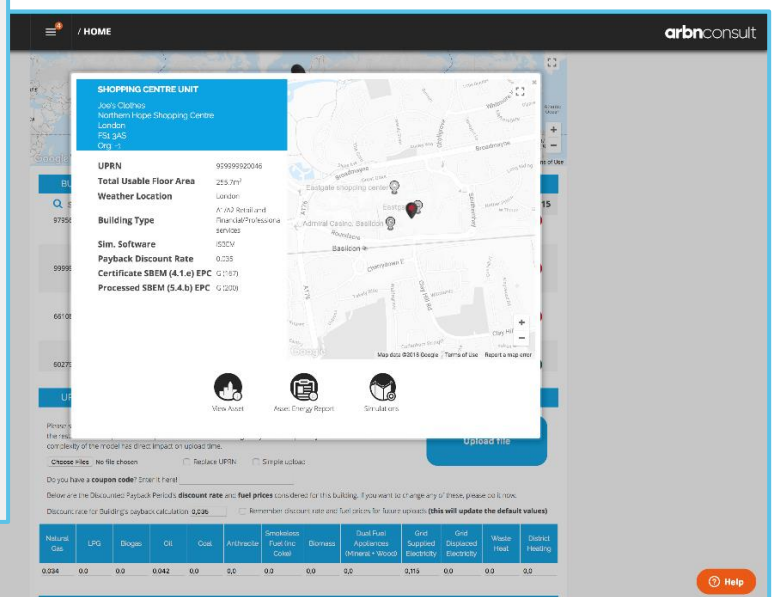

Using the model file behind an Energy Performance Certificate (EPC) a detailed Asset Energy Report is generated including:

- Full listing of improvement measures
- Accurate costings for the measures
- Energy cost savings that will be generated
- Impact on EPC rating

Practical applications of arbn consult

The platform is designed as a practical decision-making tool to enable you to:

- Plan retrofit strategies to improve energy performance
- Assess and mitigate compliance risk for MEES & Section 63
- Engage stakeholders in building improvement opportunities

About arbnco

arbnco is a building-simulation company specialising in energy management for commercial property. Formed in 2012, we develop innovative software solutions to model energy in buildings.
