InforXi

A superior platform for business

Operate seamlessly, automatically, and intelligently—anywhere in the world

Infor Xi

A powerful advancement in enterprise technology

Staying current is no longer a matter of choice—it's a matter of survival. While technologies like cloud, big data, and mobility continue to present opportunities for innovation, their increased adoption is now creating market pressure as well. Companies that fail to look ahead risk falling behind. Now is the time to give your enterprise the agility, intelligence, and cost-efficiency it needs to differentiate itself from competitors in an increasingly level playing field.

Enter Infor® Xi, the most complete technology platform available today. The result of over four years and one billion dollar's worth of research and development, Infor Xi combines decades of practical application with innovative new technologies to power organizations operating in a highly complex world.

With Infor Xi, your company gets deep analytics, advanced collaboration, and powerful development tools—all with a mobile-first design, open source compatibility, and powerful integration capabilities to make unified management a reality.

- In-context capabilities for every solution and role-based dashboards
- Support for open source (Postgres Plus, Linux); single set of APIs
- Modern cloud with auto-scaling for better economics

Science-powered business

- Machine-to-machine (M2M) solutions
- Workforce Management for healthcare
- Price and performance optimization

Cloud Enablement
Liberate your systems and your business with Infor CloudSuite

The days of being tied to one technology ecosystem are long gone. To keep pace with the demands of your industry, you need the ability to launch new products and services quickly—without squandering your entire budget. Infor CloudSuite fundamentally improves your company's economics, so you can focus on growth and innovation—not the hassle of software and hardware maintenance.

With enhanced cloud capabilities, Infor Xi helps you navigate a continuously shifting business environment. All applications built on the Xi platform include multi-tenancy and support for open source systems, so you can use solutions like Red Hat's Enterprise Linux and JBoss Enterprise Middleware, or EnterpriseDB's Postgres Plus database. The result? You can manage a unified system with a level of speed and ease that was never before possible.

You can also say good-bye to the burdens of an old-fashioned data center. Xi solutions are deployed on a secure and reliable cloud infrastructure supported by the industry's leading cloud hosting provider—Amazon Web Services. This means you can reduce costs, stay forever current, and scale more effectively—and enjoy the same level of security and economies of scale as the US federal government.

Mobile-first design
You can finally work the way you live

Being tied to a desk or even a laptop is incompatible with the way we work today. Workers in every industry need to be able to access information and perform key business tasks at a moment's notice from anywhere—and on a wide variety of devices.

With Infor Xi, mobility is not an afterthought—it's a driving force. Xi applications have been engineered to provide a singular user experience, with responsive design that delivers real-time data and analytics optimized for specific mobile devices. All your key decision-makers will have secure access to vital transactional applications and core organizational systems, like ERP or supply chain, from anywhere, 24/7/365.

Want to push a custom campaign to all prospective customers within a radius of a given location? Infor Xi makes it happen. You can easily develop custom mobile apps and deliver capabilities unique to mobile technology.

Dynamic Science Labs
Transform raw data into actionable insights

With the rise of Big Data, many companies are struggling to extract value from the vast amount of information available to them. At the same time, Big Data can translate into big opportunities—and Infor is committed to giving you the tools to take advantage of them.

At MIT's Cambridge campus, we've assembled a team of software luminaries with decades of expertise in identifying organizational bottlenecks and finding innovative solutions to the toughest problems modern businesses face. We call this team Infor Dynamic Science Labs. And their work is paying off.

Infor Xi applications use the predictive power of science to optimize all aspects of your business, from forecasting to operations.

These solutions give you:

• Automatic notifications generated from company and system-wide monitoring, allowing employees to take action on the spot

• Deep analytics and business intelligence capabilities that let you turn information into actionable insights

• Unprecedented levels of real-time collaboration across your enterprise

The result? Problem solving goes from reactive to proactive; and you can start looking forward, rather than staring in the rear-view mirror.

Infor Xi: A superior platform for business
Solve old problems in new, better ways

SoHo User Experience

Infor Ming.le Social Business	Analytics In-context business intelligence

Watch video ›

Infor Ming.le provides a centralized platform for employee collaboration, where information is shared and conversations are organized into streams across the enterprise. You'll save time by not having to search for the documents, discussions, and details that matter most, and gain the security provided by traceable communication.

The bottom line on cloud
Lower costs and gain agility

Upgrading your system to a cloud-based configuration can fundamentally transform your economics and financial agility. Trade the burden of large IT expenditures for the agility of cloud deployment.

The cost breakdown

	Cloud	On-premise
Initial license fee	None	Extensive
Subscription fee	Charged by usage	None
Maintenance fees	Included	Percentage of license fee
Support costs	Included	Extra
IT staffing	Significant reductions	Significant
Data center upkeep and maintenance	None	Large, ongoing
Upgrade fees	Included	Significant
Hardware costs	None	Large

Equipping your company for success

In the realm of business software, a revolution is under way.
Rigid and cumbersome is giving way to agile, intelligent, and above
all, fast. You no longer have to sacrifice usability and convenience for
the sake of functionality.

Infor Xi marries modern technologies with traditional applications to give you
the best of both worlds—solutions backed by decades of practical application
and continually enhanced with the latest innovations. You get software that
works the way you want, adapting and changing to meet whatever new
challenges or opportunities come your way.
