

Product Manager

About us

Existing 3D cameras are expensive, bulky, complicated, and require lots of power. Using proprietary software and hardware, **MultiVu** is developing a camera that can take 3D color images using a single inexpensive monochrome sensor in real time.

MultiVu's solution is applicable across many target markets among which are: mobile, automotive, medical devices, secure access systems and manufacturing.

Job Description

The product manager will be responsible for business development; defining new products; conducting market research, generating product requirements; determining specifications, production timetables, collaborating with engineers and design teams, pricing, product introduction as well as developing marketing strategies.

Requirements

- Prior experience as a product manager/ product owner
- BS in a technical discipline, preferably Computer Science or Engineering (MS is a big plus)
- Launched multiple successful products and features
- Excellent written and oral communication skills
- Experience in working with global organizations

To apply, please send your CV to info@multivutech.com
