OurCrowd Portfolio Companies

Consumer Software

Agentology (formerly My Agent Finder): Real-estate platform that keeps leads fresh 24/7 and connects realtors with motivated prospective buyers and sellers

Amitree: Revolutionary workflow management tool that streamlines the home-buying administrative maze

Bouqs: Direct-to-consumer e-commerce platform for purchasing fresh flowers

Blink: Mobile platform that generates highlight videos from eSports events that can be easily edited and shared

Cimagine: Augmented reality platform that allows consumers to instantly "see and imagine" physical products in their intended locations [SOLD]

Eyeway Vision: Developing the next generation of AR that uses laser-based scanning to "write" images directly onto the user's retina, emulating the way humans naturally see the world

FreshKeep: Uses IoT technology to revolutionize food storage and limits food waste

Magisto: AI-based video production and distribution of high-quality videos for businesses with no need for video expertise

MissBeez: Mobile app that brings beauty specialists, on-demand, to the door of the busy modern woman

NextPeer: Allows mobile game developers to easily integrate a top-class multiplayer feature into the gaming experience [SOLD]

Parko: Cuts time spent looking for parking by automatically matching departing and arriving cars [SOLD]

Replay Technologies: Leading developer of 360-degree 3D video that captures every angle at professional sporting events [SOLD]

Rimoto: Sponsor the high cost of data used by your app while your customers are abroad, helping you maintain user engagement during their trip

Splacer: online marketplace for people to rent and list unique event spaces

Stringify: IoT automation service that allows people to connect all their devices and digital services in one place [SOLD]

Takes: Enables you to take a picture and a video simultaneously [CLOSED]

Zcast: Live podcast broadcasting and direct interaction with listeners on social networks [CLOSED]

Cyber

AppDome: Quickly add mobile security, SDKs, and other services to apps in a single platform, without coding

Argus: The most comprehensive, modular, and multi-layered cybersecurity solution for connected cars [SOLD]

BioCatch: Uses behavioral biometrics to authenticate users and detect online fraud

CyberX: Detects both cyber and operational incidents in real time and maximizes uptime for industrial systems

Cognigo (formerly D.Day Labs): Uses advanced AI to help organizations maximize data security, data management, and GDPR compliance with minimal effort

Fireblade: Cloud-based website security for e-commerce businesses [SOLD]

Kenna Security: Helps customers prioritize pressing cyber vulnerabilities by assigning a logarithmic risk score

Morphisec: cyber solution that outsmarts hackers by morphing and obscuring the storage locations of key system resources

Opaq (formerly Bat Blue): Provides cloud-based security while optimizing network performance

OZONE.ai (formerly Covertix): Data protection and tracking for any file on any device [CLOSED]

ThetaRay: AI-based detection and protection against financial fraud, money laundering, and ATM attacks in real time

Energy & AgTech

Centaur Analytics: IoT developer of devices that track the quality of stored agricultural products to minimize waste

CropX : App-operated sensor system that optimizes crop irrigation and fertilization

EdenShield: Non-toxic crop protection that makes produce invisible to insects by masking its fragrance

enVerid: Revolutionary air treatment technology that increases energy savings and indoor air quality while reducing greenhouse gasses

Lucid Energy: Harnesses excess head pressure from moving water to produce low-cost electricity [CLOSED]

Taranis: Sensor-and-software suite that uses big data to help farmers optimize crop management using problem detection and prediction

Turbulent Energy: Revolutionary device for mixing, separating, and homogenizing liquids and gasses quickly, efficiently, and with less harmful emissions

Enterprise Software

Applango: Provides companies with insight into software usage to optimize performance

Apploi: Streamlining the recruitment process for service industries with high employee turnover

Bizzabo: Control center for event planning and attendee experience that consolidates logistical, promotional, and social tools

Briefcam: Synopsis technology that compresses video streams and revolutionizes video surveillance [SOLD]

Capester (Pish Pash): Mobile video authentication technology for crowdsourced law-enforcement [CLOSED]

data.world: Enables users to easily collect and integrate data, discover trends, and collaborate on any data set

Edgybees: AR software for drones and other high-speed moving platforms, with applications in first response, media, gaming, and more

EquityX: Blockchain-enabled marketplace in which start-ups and service providers can collaborate using equity as currency

eVigilo: Geo-targeted mass notification system (MNS) sent through all major forms of media capable of alerting millions of people about calamities

Freightos: Online marketplace that facilitates the logistical process of international shipping by providing instant quotes and rate management for importers, exporters, forwarders, and shippers

inflowz: AI-powered sales process optimization that makes data-driven suggestions about resource allocation to increase revenue, and guides representatives based on targeted and proven strategies

mPrest: Global provider of high performance monitoring, integration, and control solutions for critical systems across the defense, security, and utilities sectors, including the Iron Dome Missile Defense System

bold360 by LogMeIn (formerly Nanorep): Automated customer service provider featuring an innovative AI chatbot and live-agent software [SOLD]

Nexa3D: Developer of innovative 3D-printing technology that creates more affordable, more accurate products in minutes instead of hours

NeverWare: Developer of the CloudReady operating system that transforms obsolete computers into secure, fast, and affordable Chrome devices

NooBaa: Software-only solution for enterprise data management that combines the convenience and flexibility of public cloud storage with the security of on-premise storage

Panorama: Business intelligence software (Necto) that enables any business user to create high-quality dashboards without any coding background

PowWow: Rapid end-to-end solution that transforms even the most complex enterprise apps into modern and simple native mobile apps

Proov: Pilot-as-a-service platform that streamlines proof of concept testing between corporations and startups

Sense Education: AI-based education solution that helps instructors provide personalized feedback when grading a large volume of free-text assignments

StackIQ: Automates the task of managing the complex software infrastructure required for utilizing big data and cloud computing [SOLD]

StorePower: White label solution that enables brick-and-mortar grocers to provide online shopping options for their customers

Tapit: Easy content transfer through tapping with NFC technology [CLOSED]

TechSee: Visual technical support that uses AR to remotely demonstrate the technician's instructions

Wave: Free online financial management software for small businesses that includes accounting, invoicing, and payroll services

Wayup: Leading digital platform for employers to reach, recruit, and engage early career candidates

FinTech

BillGuard: Personal finance app that fights credit card fraud through crowdsourced vigilance and surveillance [SOLD]

Borro: Online luxury asset-backed lending platform [CLOSED]

CrediFi: Uses data and risk analysis from the commercial real estate market to provide a unique credit score that allows for insight-driven lending and investment decisions

EMQ: Trusted, secure, and low-cost alternative to international money transfer

HoneyBook: Platform that allows creative entrepreneurs to easily and professionally manage their business's administrative, marketing, and financial needs, freeing up more time to spend on their craft

Revolution Credit: Groundbreaking behavioral analytics platform that helps financial service providers make better credit decisions by modernizing the outdated credit score system

Rewire: Digital money transfer payment middleman that saves customers on international transaction fees

Hardware and IoT:

Airobotics: A pilotless drone solution with a multipurpose, on-demand, industrial-grade platform

BT9: End-to-end cold supply chain management solution with real-time monitoring and alerts

Celeno: Next-gen Wi-Fi for the era of high-speed connectivity through proprietary chipsets, edge software, and cloud technology

Clipfort: Gun safety solution using a biometric fingerprint reader on the gun's magazine

Consumer Physics: Pocket-sized molecular sensor that identifies the chemical makeup of anything in the physical world

Corephotonics: Developing a mobile camera that perfects mobile photography, known for its dual camera high-quality imaging technology

Highcon: Digital converting solution for visual communication post-print processes such as folding carton converting and commercial printing

Invertex: Anatomical 3D scanning of customer's foot for precise and instant product sizing and customization that revolutionizes shoe e-commerce [SOLD]

Intuition Robotics: AI-driven robotic companion, Elli-Q, that promotes active aging in older adults by enabling easy and intuitive access to technology that provides a seamless connection with family and friends

Mark One: Smart cup and accompanying app that tracks water consumption and encourages users to hit a personalized healthy hydration target

MUV Interactive: Developer of ring-like device that allows users to interact with media without being bound by the constraints of a single, traditional screen

Nailo: Stealth-mode, next-generation personal cosmetic device powered by machine vision

NSLComm: Applying nano-satellite expertise to launch expandable antennas into space that allow cost savings, lighter launch loads, and over ten times the bandwidth of larger traditional models

Pixie: Tags and supporting app that accurately locates everyday physical objects [CLOSED]

PQ eyewear: Personalization of eyewear to customers via smart scanning and 3D-printed glasses that fit your face [CLOSED]

uBeam: Wireless, contactless charging through ultrasound

Unispectral: Developing miniature, low-cost hyperspectral imaging MEMS sensors for smartphone camera applications that combine image capture, computer vision, and spectroscopy to create "intelligent" images

VocalZoom: a unique optical sensor technology for accurate measurement of distance, speed, and vibration for predictive maintenance at scale with very low integration costs

Mobility:

[Arbe Robotics](#): Building real-time 4D imaging radar to allow autonomous cars to analyze their surroundings in all environments and conditions

[Boatbound](#): Peer-to-peer boat rental marketplace [SOLD]

[Engie](#): Provides car diagnostics in real-time and offers a range of price quotes from nearby mechanics

[Hailo](#): Semiconductor company developing a proprietary chip for AI and machine learning in edge devices rather than in data centers/the cloud with a focus on data-processing in autonomous vehicles

[Innoviz](#): Enabling autonomous mobility with solid state LiDAR sensors, sensor fusion, and accurate mapping and localization products

[JUMP (formerly Social Bicycles)](#): Fully integrated smart bike-sharing platform [SOLD]

[Phantom Auto](#): Remote operation solution for autonomous vehicles

[skyTran](#): A faster, greener form of travel using magnetic levitation technology, offering the first real alternative to cars, circumventing traffic at a much lower cost per mile than other forms of ground transportation

[VayaVision](#): Raw data sensor fusion platform and 'point & shoot' LiDAR for autonomous cars

[Virgin Hyperloop One](#): Ground transportation at airline speed for passengers and freight using a reduced-pressure tube with magnetically levitated pods

[Zoomcar](#): India's largest self-drive mobility company

Marketing & AdTech

[AppForma](#): automated marketing and social media platform for SMBs using artificial marketing intelligence [SOLD]

[BIScience](#): competitive intelligence tool for online media that tracks and analyzes the success of competitors' marketing strategies

[Crosswise](#): Cross-device identification mapping service that allows advertisers to consistently target individuals across different devices [SOLD]

[Curiyo](#): Keeps readers on a website by bringing related content directly to them [CLOSED]

[Influitive](#): Platform for B2B marketers to easily mobilize advocates to refer new customers and significantly enhance marketing campaigns

[MentAd](#): Predictive-marketing platform that helps businesses identify new profitable opportunities and increase customers [SOLD]

[Near](#): Ambient intelligence platform that helps businesses understand consumers in varied environments and offers actionable contextual data

[PushApps](#): Transforms traditional push notifications into multi-optioned, dynamically optimized interactive notifications [CLOSED]

[Shopial](#): Turns an online store into a Facebook store in 3 clicks, empowering brands to reach more customers [SOLD]

[Ubimo](#): Leverages AI and location data analysis to enable advertisers to send the right messages to the right audience at the right time

[Viewbix](#): Platform for engagement-based video with actionable insights that allows clients to quickly and easily add brand assets, interactive applications, and calls to action to videos

[Webydo](#): Code-free website design built for web designers

Medtech and Digital Health

Alpha Tau: Treating solid malignant tumors using targeted alpha radiation, while minimizing damage to healthy surrounding tissue

BrainQ: non-invasive technology to treat a range of neurological pathologies that uses AI to detect neural patterns in patients and tailors electromagnetic fields to target patients' impaired neural networks, repair neural connectivity, and enhance natural rehabilitation

DreaMed: Developers of a next-generation machine-learning solution for diabetes management, facilitating daily management and patient-doctor communication

ElMindA: Mapping tool for visualizing neural activity to optimize management of brain disorders and injuries

Global Kinetics Corporation: Wearable sensor and advanced analytics system for tracking movement disorder symptoms, such as Parkinson's Disease, to optimize treatment

HIL Medical: Compacts the proton-therapy system hardware to make this high-performance cancer treatment affordable and space-efficient

Insightec: MR-guided focused ultrasound technology for non-invasive surgery on patients with essential tremors, tremor-dominant Parkinson's disease, and neuropathic pain

Intendu: First individualized brain rehabilitation platform utilizing motion-interaction that enables at-home therapy

KolGene: Digital management tool for clinicians that streamlines and optimizes the process of ordering genetic testing and receiving results

MedAware: Big data analytics and machine learning that enables healthcare providers and pharmacy chains to identify and eliminate prescription errors

MeMed: Enabling early prescription and preventing misuse of antibiotics with personalized diagnostics by decoding the human immune system

Memic: Laparoscopic surgical robotic arms controlled by the surgeon that allow them to operate on previously inoperable areas due to their size and flexibility

MPIRICA Health Analytics: provides patients and self-insured employers with a simple and trustworthy score of medical quality to compare hospitals and surgeons

MST: Robotic vision system with AI-enabled environment recognition for laparoscopic surgery

Ossio: Promising improved clinical outcomes by using osteoconductive implant technology without changing orthopedic surgical technique

Pulm One: Portable desktop lung function testing

RealView Imaging: Developed technology for live holography that provides a natural user experience, creating accurate, interactive, 3D holograms without the need any screen or eyewear

ReWalk: Lightweight exoskeleton that enables those with spinal cord injuries to walk again [NSDQ: RWLK]

Scopio: Revolutionizing the fields of pathology and microscopy-based diagnostics by introducing the world's first affordable, clinical-grade digital microscope

Sight Diagnostics: Low-cost blood diagnostics through computer vision that is fast, simple-to-use, and accurate

Surgical Theater: Patient-specific 360-degree VR platform for planning, discussing, and rehearsing complex surgical procedures

Sweetch: Mobile health app with paired wearable device that accurately predicts personal diabetes risk and drives long-term behavioral change for prevention

Syqe Medical: Easy-to-use metered-dose inhaler for medical cannabis that delivers optimum treatment in a precise, reliable, and safe way

Trendlines: Incubator that establishes, invests in, and develops medtech and agtech early-stage companies [SGX: 42T]

UPnRIDE: All-terrain electric wheelchair that enables stable standing and mobility for quadriplegics and handicapped individuals

Zebra Medical Vision: Medical imaging insights platform with algorithm-based assistance for radiologists in detecting often overlooked disease indicators by analyzing millions of imaging records and providing an automated, accurate, and timely medical image diagnosis

Qure: Israel's first fund focused exclusively on digital health

CybermdX: Cutting-edge cybersecurity solution for connected medical devices and clinical networks

Dario: Personalized, pocket-sized, all-in-one glucose meter coupled with a robust real-time mobile app to monitor and manage diabetes quickly, efficiently, and accurately

TytoCare: Transforms primary care and telehealth by connecting people to clinicians with a remote examination tool to provide the best home examination and diagnosis solutions

Labs02: OurCrowd's government-backed seed-stage incubator, in collaboration with Motorola, Reliance, and the Hebrew University to advance cutting-edge technology that will shape the future

C2A: combining large-system security, artificial intelligence, machine learning, and hardware and software security solutions to develop cybersecurity for connected vehicles

ForceNock: Developing a fully autonomous web application security solution that replaces existing WAF, API & bot mitigation solutions. The system frees the security teams from managing endless configurations and rules while continuing to maintain the highest level of security.

Other Funds

ADvantage: OurCrowd's fund focused on early-stage sports-tech, co-founded with the global leAD Sports accelerator backed by the Adi Dassler International Family Office

Cognitiv: Early-stage fund focused on artificial intelligence and cognitive technologies

Maniv Mobility: Israel's first venture capital fund dedicated exclusively to the new mobility future, investing in early-stage transportation innovation

Oxx: Growth-stage fund focused on B2B software companies in the UK, Nordics, and Israel

Proof: US-based fund providing proprietary access to the best venture-backed companies

Radicle Growth: US-based agtech accelerator making large investments in seed-stage companies; joint venture with DuPont, Pioneer, Bayer, and Finistere Ventures

U.S. Venture Partners (USVP): Focused on promising early-stage IT and healthcare ventures; one of the most well-established and best-known Silicon Valley venture investment firms
