

# Helping patients and families compare and choose the right post-acute care provider.

Ensocare partner hospitals can now engage patients in their care transition process and document patient choice using Ensocare Choice.

### Seamless

Ensocare Choice integrates seamlessly with your existing Ensocare software and current workflow.

### Save Time

Patients are given the information needed to make an informed decision about post-acute care providers.

IMPACT  
Quality Initiative

### Document Patient Choice

Patient choice is documented and stored to comply with the IMPACT Act.

## Ensocare Choice

Tablets are pre-loaded with provider profiles that match the patient's unique needs, as identified by care planners using Ensocare.

## ▶ Benefits of Ensocare Choice

### Personalized

Provider facilities can be sorted by the patient's personal preferences, such as location, CMS star rating and accepted insurance.

### Transparency

Rich detailed information allows patients to virtually see and experience each facility and make an informed choice.

### Patient Engagement

Increase patient satisfaction and involvement by allowing them to force rank top choices, which are documented for regulatory purposes.

## ▶ How It Works: *From reducing time-to-discharge to minimizing readmission risk*

- » Hospitals load hospital managed tablet devices with the Ensocare Choice app from the Google Play Store or Apple App Store.
- » Patients are offered a tablet device at bedside to review post-acute care choices.
- » Compare profiles, photos, videos, testimonials and quality ratings.
- » Positively impact the patient experience and engage patients in their own care transition.
- » Comply with the Medicare Conditions of Participation (CoP) by linking directly to each facility's CMS page and documenting Patient Choice in the app

## About Ensocare

Ensocare provides care coordination solutions to help manage patient care transitions, reduce length of stay and reduce readmissions. Unique technology and a proactive service model enable Ensocare's no-cost, all-inclusive post-acute provider network. Our software integrates with existing EHR platforms to encourage patient compliance, build operational efficiencies and improve patient satisfaction.
