# ENSOCARE Transition

## Search, Select and Send from One Easy-to-Use SaaS Platform

Ensocare Transition's software allows those responsible for moving patients along the continuum of care to measurably decrease the time spent on clerical activities, increase the speed at which transfers of care can be achieved and better match patients with the right care providers and care settings, all from one easy-to-use platform.

Say goodbye to phone tag or standing by the copier and fax machine. Using Ensocare Transition, details about a patient's clinical needs and personal preferences are entered into the system. At the push of a button, referral requests are transmitted to eligible providers. Within minutes, skilled nursing facilities, rehabilitation facilities, home health agencies, other post-acute care providers or community-based service providers respond. Your patient is one step closer to their next stop, faster and more accurately.

Transitions of Care refer to the movement of patients between health care practitioners, settings, and home as their condition and care needs change. Ensocare's Transition software and technology-enabled services automate and simplify the activities surrounding care transitions, leaving more time for face-to-face patient care.

Efficiently Connect  
Patients With Appropriate  
Levels of Care in the  
Right Care Settings  
When and Where  
They Need It

## Placing Referral Decisions in the Hands of the Patient

Embedded right inside of Ensocare Transition, **Ensocare Choice** is a no-cost feature that allows patients and family members to review choices and make decisions about the next steps in their personal care journey. Easy-to-navigate tablet technology provides needed information then guides patients through the options. Through a simple process of elimination, patient choice is accomplished and accurately recorded.

# ENSOCARE Transition

Solves  
common  
challenges

relating to patient  
transitions of care

- Time-consuming, labor-intensive and even manual processes surrounding patient transitions.
- Increased risk of readmission when patients are placed in inappropriate care settings.
- Increased length of stay due to the inability to locate an appropriate care setting.
- Patient dissatisfaction caused by care transition challenges.

Ensocare's technology-enabled approach helps hospitals:

Accomplish seamless and efficient patient handoffs.

Minimize the risk of readmission

Increase staff efficiency and streamline discharge.

Maintain short lengths of stay, especially for hard-to-place patients.

Increase patient satisfaction.

Ensocare Transition empowers providers and community-based organizations to:

Connect to thousands of hospitals and other providers seeking care and services at no cost.

Achieve faster, equal access to referrals.

Improve revenue by filling empty beds.

Respond to referral requests from anywhere using our mobile app, **Ensocare Respond**.
