

Self-Service Reporting in Real Time

Ensocare's Insight Software Solution

It is difficult to improve processes without data. **Ensocare Insight's** powerful analytics enable you to monitor trends and outcomes, discover opportunities for improvement and determine ways to actively manage your patients and your network.

Tools to Analyze the Responsiveness and Engagement of the Network

Ensocare Insight allows users to access real-time reports to assess clinical workflows, discharge referral patterns and post-acute network engagement.

The Ensocare Difference

Ensocare brings a proven track record of engaging and activating various disciplines in the patient care continuum. Designed for efficiency and interoperability, solutions like **Ensocare Insight** deliver the data needed to drive improved outcomes. Some additional benefits include:

- » Identify opportunities for operational efficiencies
- » Gain key insights and benchmark provider performance
- » Identify data patterns to better optimize workflows or allocate resources
- » Manage network relationships
- » Increase patient satisfaction
