

The Source for Superior Care Path Tracking, Communication and Coordination

Ensocare's Sync and Connect Software Solutions

From physicians to care managers, pharmacists to family members, everyone involved in a patient's care plan has the same goal: to provide exceptional care and promote quality outcomes. We are passionate about uniting patients, families and healthcare organizations to guide patients to the right level of care – leveraging industry-leading technology with Sync and Connect. Together, these solutions offer a holistic way to manage a patient's recovery and avoid preventable hospital readmissions.

From the Hospital to the Home and Every Step in Between

Sync serves as the digital command center, communicating the care plan, monitoring the patient and creating updates as their needs change. This helps align all members of a patient's care team, including primary care physicians, care managers, home health nurses, pharmacists and family members. Further, by incorporating Ensocare's 24/7 customer support team, Sync helps the patient stay on track with the care plan, identifying any missed steps and resolving or escalating any concerns to the appropriate care team member.

Engaging the Patient, Educating the Care Team

Our **Connect** solution works with Sync to enable easier communication: Members of the patient's care team can contact physicians and other medical staff concerning the patient's progress, collect and input health-related data and gather educational materials to encourage patient compliance and engagement in the care plan. Patients and families using Connect can also access a step-by-step customized care plan, which may include directions for medications, follow-up appointments and educational materials.

The Ensocare Difference

Ensocare has a proven track record of engaging and activating various disciplines in the patient care continuum. Designed for efficiency and interoperability, solutions such as Sync and Connect enable exceptional care coordination for improved patient outcomes. Some additional benefits include:

- » A patient-centric communication system with personalized care plans
- » HIPAA-compliant connectivity among patients, providers and caregivers
- » Care coordination across multiple providers with real-time updates
- » Automated data collection on patient adherence, progress, behaviors and outcomes
- » Full integration with EHRs and wearable devices to track progress and measure results
- » Improved outcomes, adherence and patient education
- » Reduced readmissions, enhanced workflows and increased patient satisfaction

How it Works: Collaborating on Patient Care from Every Angle

Utilizing robust technology backed by superior customer support, Sync and Connect keep patients in sight and on track, save your staff time and help avoid preventable readmissions.

Sync remotely monitors adherence and automatically sends alerts to appropriate care team members when interventions or escalations are needed, further permitting:

- » Customized care path tracking and ongoing coordinated care
- » Reduced clinical burden to monitor patients
- » Early interventions as needed
- » Customizable alerts to accelerate response times and escalations

Enabling the flow of vital information between the patient, family members and the care team, **Connect** delivers:

- » Seamless communication with the entire care team
- » Ability to review condition-specific information
- » Line of sight to a patient's after-hospital care
- » An Interface With Hospital's Already-Prepared Clinical Communication Documents Or Third-Party Provider's Education Materials

With a Variety of Innovative Features, Sync and Connect Make Managing a Patient Easy and Convenient:

- » Interactive social technology
- » HIPAA compliant
- » Web and mobile app
- » Health trackers and device integration
- » Medication management
- » Analytics and reporting
