

# CLEANER AIR ➞ PROPANE

If **one family** switched to cooking with propane instead of wood

**1,231 pounds** of CO<sub>2</sub> would be eliminated each year

If **100 families** move from cooking with wood to propane

**1 acre** of rainforest is saved each year

India is moving **3 million families** each year to propane

That means over **5.5 million tons** of CO<sub>2</sub> was eliminated in the past three years.

Want to...

Save the Rainforest?

Make the Air Cleaner?

Fight Climate Change?

## PROPANE CAN DO THAT™
