

America's retailers need to stay competitive – which means executing merchandise planning processes, overseeing efficient supply chain management, and addressing emerging market trends successfully. The last thing business leaders have time for is worrying about fairly and accurately reimbursing their mobile employees for business mileage. And their employees don't have time to spend hours each week manually tracking and reporting their mileage.

With a mileage reimbursement technology platform and best-in-class mileage tracking app, **Motus makes work life better for retail managers.**

Fair and accurate

With Motus, we are paying a fairer amount to the driver and they are entering more accurate mileage.

— Business Professional, Large Enterprise Retail Company

Program visibility

The ability to report information is most helpful for us. It helps us manage our costs and monitor enrollment in the program.

— Human Resources Director, Large Enterprise Retail Company

And their mobile employees.

Ease of use

Motus remembers even when I forget. It is extremely easy to use and it makes submitting mileage at the end of the period a breeze.

— Business Professional, Small Business Retail Company

Time savings

Motus saves me a lot of time.

— Consultant, Large Enterprise Retail Company

The result? Everyone wins.

Motus has reduced costs, increased efficiency, and increased the ease of mileage reporting for our users.

— Accounting Manager, Medium Enterprise Retail Company
