## The ONLY Fiber Optic Cable You Will Ever Need...

TiniFiber® is “The Single Best Solution” for quality fiber optic cables built around the smallest Outer Diameter (OD) stainless steel Micro Armor Fiber™ for protection, durability, bendability and ruggedness to protect your investment for all project usages.

### Quick Facts...

- ➔ Micro Armor Fiber™ is a new product category that incorporates a tightly wrapped stainless steel coil designed to provide the lightest, strongest and most flexible solution
- ➔ Jackets available for Riser, PE, PU, Plenum, Indoor/Outdoor, LSZH, Direct Burial, Industrial and Harsh Environments
- ➔ Designed to lower the installation cost of support systems, pathways and manpower labor hours
- ➔ TiniFiber® Micro Armor Fiber™ is approximately 65% smaller and 75% lighter than typical Aluminum Interlock Armor (AIA) fiber
- ➔ Smallest OD and very high flexibility allow for easy installation into tight pathways, risers and bends
- ➔ OS2, OM1, OM3, and OM4 from 1 to 144 Strands (250u/900u/Ribbon)
- ➔ Multi-strand pre-termination is available with MTP/MPO, LC, SC, ST, MU, etc...
- ➔ Micro Armor Fiber™ patch cords are half the size and about 100 times the strength of conventional jumpers
- ➔ 25-Year Limited Warranty against rodent attack and manufacturing defect

## 12-Strand Fiber Optic Armor Competitive Analysis - Based on 1000 FT

### Tinifiber® Micro-Armor Fiber™

**Fiber Count: 12**  
**Diameter: 5.5mm**  
**Weight: 98 lbs.**

### Aluminum Interlocking Armor

**Fiber Count: 12**  
**Diameter: 13.95mm**  
**Weight: 395 lbs.**
