

LOW VOLUME BUILD & MANUFACTURING SOLUTIONS

From prototype to production all under one roof.

Digital technology is changing the manufacturing game with both speed and complexity. Companies face increasing consumer pressure to build what they want, when they want it with greater variety and customization – releasing new products and version upgrades and incubating complex products faster than ever before.

While a tremendous opportunity – it also introduces untold challenges when moving quickly to high volume is not an option, and yet low volume manufacturing services are sparse and expensive. Add to this... traditional hardware companies lack design-to-manufacturing expertise and low-volume assembly resources needed to successfully execute.

Enter Radius

Radius' Low-Volume Build and Manufacturing Solutions offer a full spectrum of prototype to production, distribution, fulfillment, service and repair services under one roof to augment go-to-market expertise and delivery capabilities.

We offer a commercialization model to capture and understand market and consumer insights, and we apply deep DFM experience to help with accurate development and scale of solutions all through one partner. Further, Radius offers access to Tier 1 capabilities and expertise regardless of volume needs, leveraging Jabil's scale and deep investment in cutting-edge optics, adhesives, acoustics, and 1,600 other advanced capabilities. Finally, we bring flexibility for peace of mind through our global footprint featuring 100 facilities in 29 countries.

Building your solution off-shore? Radius enables the combination of low-volume manufacturing and regulatory compliance in country of origin, supporting cost-efficient volume manufacturing scale abroad.

Looking to:

- Address speed to market concerns, allowing for speedy test and assess capabilities for user and market acceptance fast?
- Accelerate design, build, test, and analysis cycles all under one roof?
- Reduce product realization cost and risk by removing multiple dispersed partners from the mix?
- Cut complexity and potential IP risks and silo'd work that creates inconsistencies and quality issues?
- Cut requirement for excessive inventory and operational expenses?
- Improve scaling efficiency to enable effective and timely ramp as market acceptance grows and volume needs increase?
- Make switching from low- to high-volume production seamless and flexible?

Radius is the solution.

INNOVATION REALIZED. | OUTCOMES ACHIEVED.

Our capabilities include:

- DPL – Digital Prototyping Lab
- LVPL – Low-Volume Prototyping Lab
- Early NPI – Preliminary Joint NPI Builds
- SBP Solutions: Small Batch Production Solutions
- Retail Solutions: Integrated Technology & Fixturing in Retail
- End-to-End Fulfillment: Small Batch Warehousing & Distribution
- Refurbishment Solutions: Full reverse logistic solutions with comprehensive repair and refurbishment services

Radius offers low volume hardware innovation and product development consulting services differentiated by direct access to Tier 1 manufacturing capabilities and expertise. We unlock opportunities by eliminating

the low volume conundrum. And we are different than any other solution out there . . . We enable you to realize your products at the right pace and scale to succeed in the market, increasing speed to market and hardware confidence. Your solutions can be tested and assessed for user and market acceptance quickly as we accelerate the design, build, test, and analyze cycles all under one roof. The model diminishes your risk and requirement for excessive inventory and operational expenses and it promises to bring improved scaling efficiency that allows you to grow as market acceptance grows and volume needs increase.

Go ahead. Switch from low- to high-volume production with ease. It's seamless and completely flexible with Radius.

About Radius Innovation & Development

Radius is a global innovation and product development consultancy firm. It is integrated into one of the largest, most technologically advanced manufacturing solution providers—Jabil.

JABIL (NYSE:JBL) works with the world's biggest and best-known brands and technology startups, providing comprehensive design, manufacturing, supply chain, and product management services. Operating from over 100 facilities in 29 countries, Jabil delivers innovative, integrated, and tailored solutions to customers across a broad range of industries. For more information, visit Jabil.com.
