

Reading Assistant Recommended Headsets

To receive the full benefit of the Reading Assistant program, high-quality stereo headphones of appropriate size that completely cover the ears are **highly recommended**.

- **Do not** use noise-cancelling headphones.
- Use digital, binaural (each ear is getting a different signal).
- Use stereo headphones with adjustable microphone.

On a Computer

A USB headset is required for Reading Assistant on the Computer. We recommend the Microsoft Lifechat LX-3000 USB Headset, the Logitech H390 USB Headset or a combination of the Logitech H150 and a USB adapter.

On an iPad

We recommend the Logitech H150 and a 3.5mm 4pin to 2x3pin headset splitter adapter.

The Microsoft Lifechat LX-3000 USB Headset or the Logitech H390 USB Headset can be purchased from most computer accessory stores. The price varies between \$30 and \$50.

The Logitech H150 and either adapter can be purchased on line and the combined price can vary between \$20 to \$40. Some recommended websites are:
