

Jedox Fast Start Setup Guide

In our Fast Start e-Learning session, you will be learning how to create models in Jedox's Excel environment.

- If you downloaded our Jedox Cloud Trial, please watch our online course video below and follow the steps: <u>https://www.jedox.com/en/online-course/video-1-connect-excel-add-in-to-cloud-</u> <u>servernetwork-server/</u>
- 2) What will you learn:
 - Connect the Jedox Excel Add-In to a cloud server/network
 - Using the Jedox Connection Wizard
- 3) If you are using our Jedox trial on your own laptop, go to Excel and check you are setup:a. Excel will automatically be connected to your local Jedox.

You can easily test this by clicking View/Paste View and you will see your Jedox instance with one or two sample models like Biker and Demo. This is named "localhost" by default.

-									
	(), F	Paste View - /	Ad-Hoc View					_	
ľ	()=1	Definition	Options
