

Over the last decade, both Agile and change management have emerged as strategies to improve change outcomes. Organizations are now looking for approaches to integrate change management and Agile to improve the adoption and usage of iteratively designed solutions. In this innovative one-day workshop, explore the latest research and build specific tactics and plans for adapting change management to Agile iterative development. In this workshop, Prosci provides the best practices and frameworks for applying change management in an Agile environment.

## THIS WORKSHOP IS FOR:

This workshop is designed for people who are responsible for delivering the people-side results on Agile projects including:

- Change management practitioners supporting Agile efforts
- Agile practitioners integrating the people side into their work
- Project leaders incorporating Agile principles
- Any change agent who wants to stay at the forefront of this growing discipline

## LEARNING OBJECTIVES

Throughout this workshop, you will:

- Understand the foundation and parallels of change management and Agile
- Explore industry-leading research on how to manage change adoption in an Agile initiative
- Identify specific adaptations for your change management approach
- Align the Prosci ADKAR<sup>®</sup> Model with Agile efforts and sprints/releases
- Align the five organizational change management plans to Agile and identify specific adjustments for each
- Define change management roles in an Agile environment
