IBM BigFix Professional Services

We Customize Your BigFix Environment To Optimize Each Module's Performance

CBI's professional BigFix services extend well beyond deployment, optimization, upgrades, and standard consulting services. We offer a wide range of BigFix platform extensions and customization.

IBM BigFix Services Offered

Assessments including wellness checks and operator knowledge with recommendations

Development of custom content (fixlets, tasks, reports, etc.)

Staff augmentation, including co-managed BigFix services

Integrations with 3rd party applications for various purposes

Customized hands-on training – at your location. Content built during the training can be leveraged by the customer after the workshop
