

Step 1- Finding out what version your Mac is

Select the Apple icon 🗰 about this Mac

Step 2- Finding out the I.P address of your Canon device

Go to your Canon machine and select

- Settings/Registration button
- Preferences
- Network
- Output Report
- Do you want to print the User data list (Yes)

The machine will print out a 3 pages User Data List, on this you will find your machine's I.P address.

Step 3 - Downloading Drivers and Downloads

Go to the Canon website

https://www.canon.com.au/en-AU/Business/Support/Drivers-and-Downloads

a your product		_	_	
nave selected drivers and downloads				Type in and select your

Step 12 - How to default your print driver Options via CUPS

If you would like to set your printer to default Single Sided or Black & White follow the below instructions on your Mac

Since CUPS uses the Internet Printing Protocol, it is also a fully-functional web server. To use your web browser to monitor the printers on your system, open Safari and type the following URL; http://localhost:631

Note:

For 10.8, the CUPS page is blocked by default. To enable it, open Terminal and type "sudo cupsctl Web Interface=yes" (without the quotation marks). Enter the admin password when prompted and then refresh the browser view. Local host can be replaced with 127.0.0.1 From the CUPS web page you can create new printers or modify existing ones

From the CUPS web page you can create new printers or modify existing ones.

Step 13 - Setting Printer Defaults via CUPS

It is possible to set the defaults of a printer driver via the CUPS admin web page. This can be helpful when a user has a colour printer but wants the default output setting to be black and white.

(Note that this does not stop a user from selecting the alternate setting. It simply sets the default so that the print dialog menus do not have to be opened.)

With the CUPS web page open, select the Printers tab and then select the printer you want to modify. Then

from the Administration drop menu, change to "Set Default Options".

This will show a new page with four menu headings (links); Options Installed, General, Banners and Policies.... Select General.

Step 14 - Setting Printer Defaults via CUPS

Scroll down the list until you find the option you want to set as default. For example, if you wanted to set the driver to a default of black & white, scroll to Colour Mode.

Print on:	Off 🗘
Paper Source:	Drawer 1
Quality .	Black and White
Color Mode 🗸	Color
Color Mode:	Color
Pure Black Text:	Printer Default

Note: that the Color Mode appears twice for the Canon PS driver. Both menus need to be set to Black and White for correct operation.

With the option select you then need to scroll down the list to the bottom of the page where you will see the 'Set Default Options' button.

Click this button and you will then be presented with an authentication window.

Processing Method:	Do Not Use Overlay Printing	•
Apply to:	All Pages	

Enter the account name and password that has been set as the admin for this Mac. And then press the Log In button. You will then see another page stating that the information change has been set successfully.

To view this page, you must log in to area "CUPS" on 127.0.0.1:631.
Your password will be sent unencrypted.
Name:
Password:
Remember this password in my keychain
Cancel Log In

You can now check that the change has been successful by selecting to print this page from Safari. With the correct printer selected change to the relevant menu, in this case Quality, to ensure your modification has worked. As shown below, the Black and White setting is now the default.
