

Apple AirPrint is built into the latest models of Canon printers. It assists in producing quality print from your iPhone, iPad or iPod touch without having to install or download drivers.

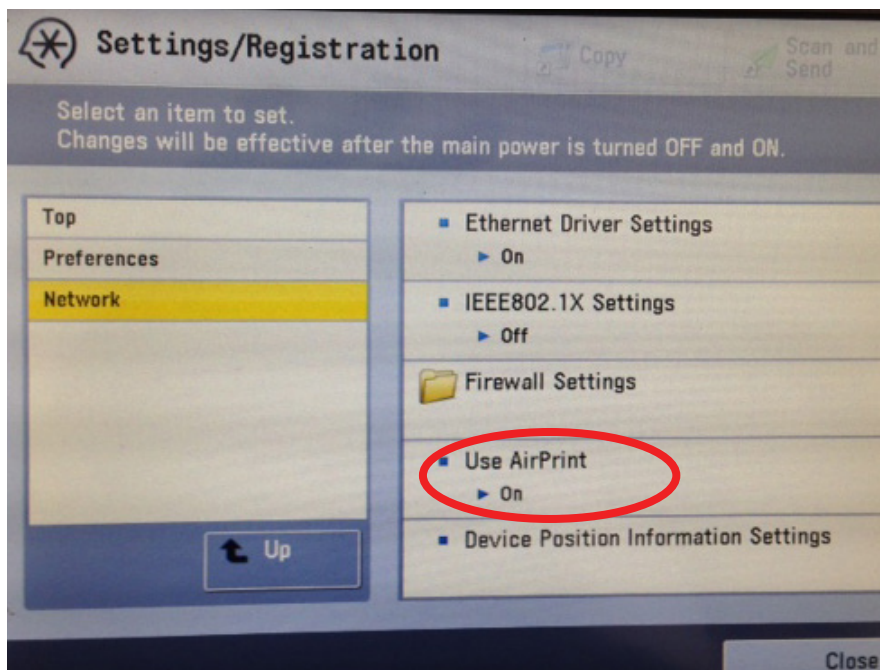

To use an AirPrinter with your Wi-Fi Network, make sure your printer is connected to the same network as your iOS device. Then select the AirPrint printer from your favorite app, and you're ready to print.

Step 1

Go to Settings/ Registration

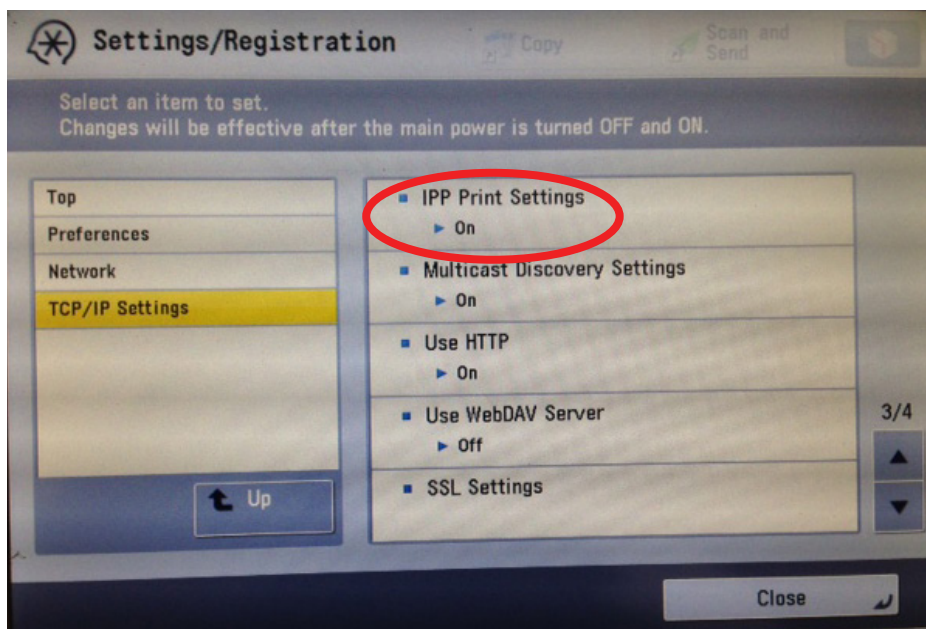

Login: System Manager ID-7654324 System Pin- 1234567

Select Preferences > Network > Page down> and press "Use AirPrint"

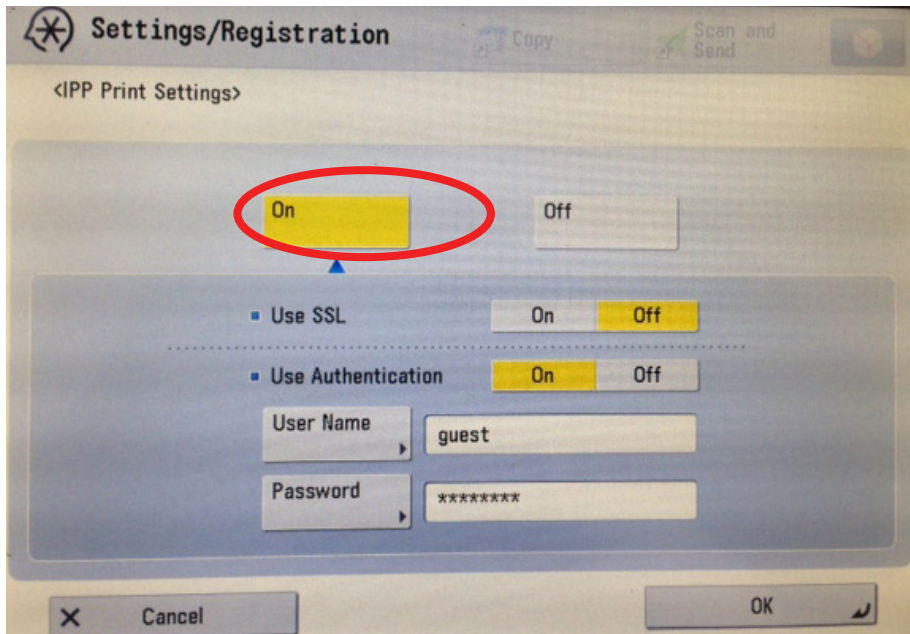

Step 2

Page up to TCP/IP Settings

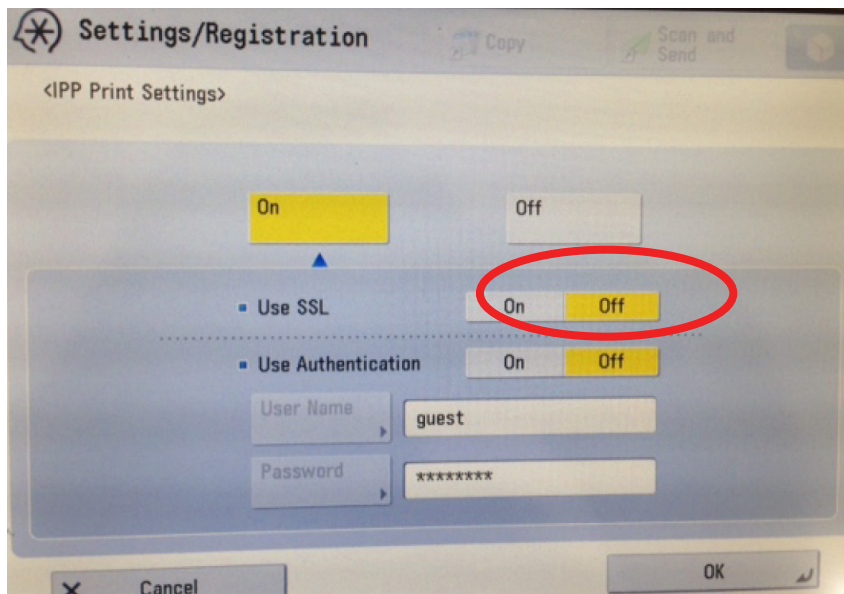

Step 3

Make sure IPP Print Settings are ON

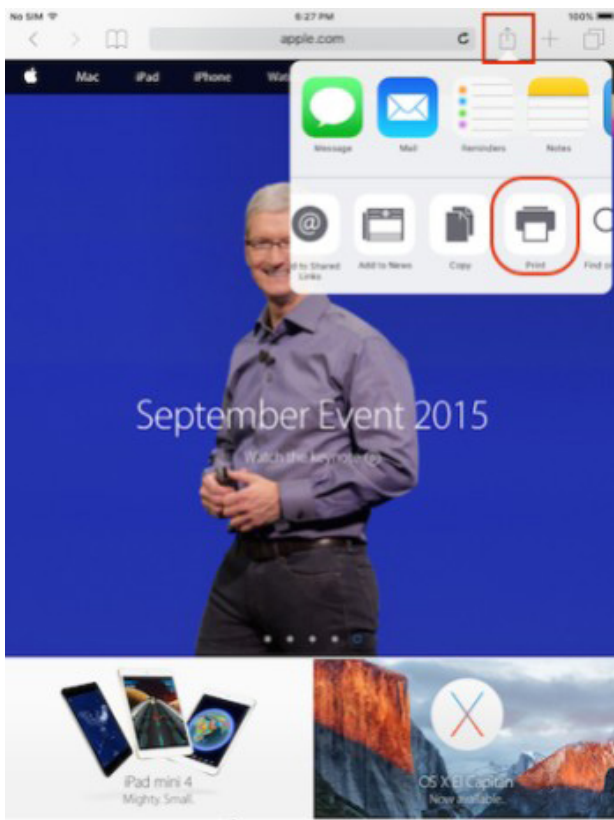

Step 4

Turn OFF use SSL Print Settings

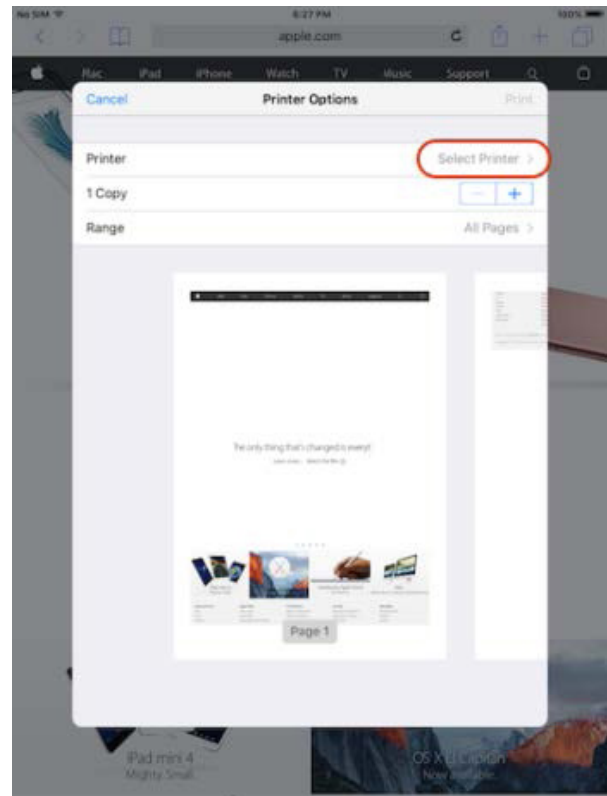

Step 5

On your Apple device, go to the page you want to print, select the action button, and press print.

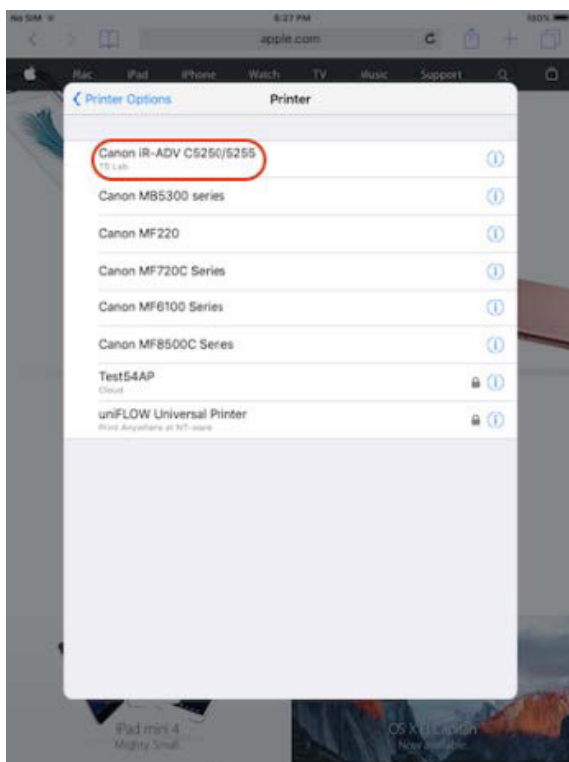

Step 6

The printer options will appear. Press the select printer button

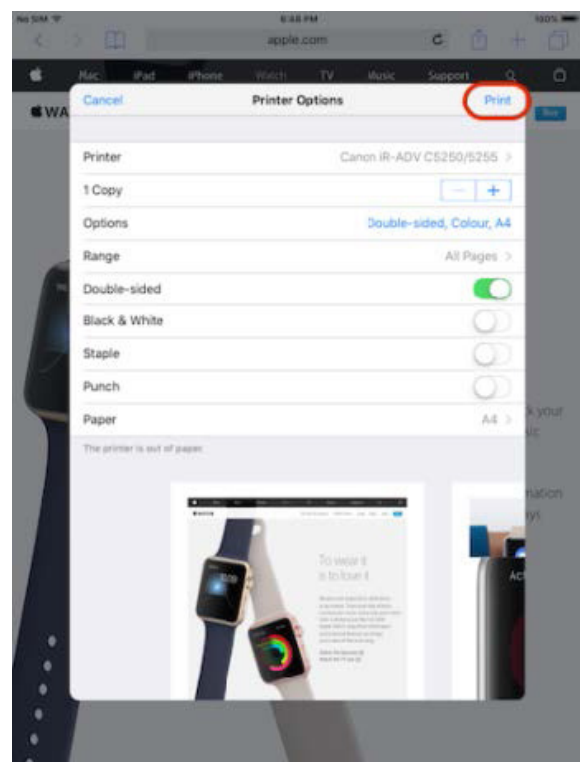

Step 7

Select your Canon device from the menu

Step 8

If you are happy with the remaining print options fields then press the print button
