

# Care Net IMPACT REPORT SAVING LIVES, HEALING HEARTS

**YOU'RE making an incredible impact on life!** With your support, Care Net reaches out to abortion determined women and men with truth and hope, empowering many to CHOOSE LIFE! Here's a quick glance at the difference you have made.

IN THE PAST 8 YEARS **531,977** LIVES SAVED!<sup>1</sup>  
This impact is among clients visiting a Care Net center who are at risk for abortion.

## PREGNANCY CENTERS

Approximately 1,100 Care Net affiliated pregnancy centers welcome those facing unplanned pregnancies with life-affirming compassion, hope, and help. Every year about 30,000 people volunteer at these pregnancy centers. And since 2009, there has been a 20 percent growth in the number of Care Net centers providing free ultrasounds to their clients.

## HOW HAVE WE SERVED IN THE LAST 8 YEARS?<sup>1</sup>

**8 out of 10 women** who are considering abortion when they visit a Care Net Pregnancy Center

**CHOOSE LIFE**

for their unborn children.

HIGHEST AGE RISK: 20's

**823,186** free ultrasound scans  
Over **940,00** received parenting support and education  
More than **1.3 million** people heard the Gospel  
Nearly **1.4 million** people received material resources  
**2.3 million** free pregnancy tests

**57%**

of abortions are performed on women ages 20–29<sup>2</sup>

**58%**

of Pregnancy Center Clients are ages 20–29<sup>1</sup>

**PDL reaches the MOST ABORTION DETERMINED**

## PREGNANCY DECISION LINE

### REACHING THOSE MOST AT RISK

Care Net operates the Pregnancy Decision Line (PDL) — the only national call center and Internet website designed to reach people considering abortion with immediate pregnancy decision coaching, information, and referrals.

### WHO WE SERVE

**80%**

of PDL clients are at risk for abortion.

Over **150,000 visitors** to the website have been a result of targeted keyword advertising supported by donations.

1. Statistics come from internal data collection and the 2008–2015 Annual Statistics from Care Net affiliated pregnancy centers. Number is based on the “last stated intent” of women at risk for abortion who visit a center.

2. Jones RK, Finer LB, and Singh S, Characteristics of U.S. Abortion Patients, 2008, New York: Guttmacher Institute, 2010.
