

Accelerate. Advance. Achieve.

Success in your General Medicine trial with Accelovance.

Sponsors have entrusted us to manage more than 300 clinical trials, either full or functional services, from concept development to final report. We have worked across a wide variety of therapeutic categories, including: Dermatology, Nutrition, Pain, and Women's Health.

Put our experience to work for you.

accelovance
ACCELERATE. ADVANCE. ACHIEVE.

What We Bring to the Table

Emphasis on Planning

- Seasoned professionals with relevant scientific, therapeutic, and operational expertise who work with you throughout all stages of the trial lifecycle
- Utilization of our strong and thorough feasibility process for the pre-selection of highly-qualified sites
- A proactive approach to project planning to ensure consistent achievement of trial milestones

Patient-Centric to Yield Results

- Preferred relationships with some of the most successful enrolling sites in the country with access to appropriate patient populations
- Creating and implementing our innovative branded recruitment strategies to elevate site performance and patient engagement
- Leveraging our expertise in sourcing and retaining treatment-naïve subjects

Global Capability

- Utilization of our 100%-owned subsidiary in China (for region-specific or globally-integrated work)
- Leveraging the results of our proven performance providing global solutions in Eastern and Western Europe, Northern Africa, South Africa, India, South America, and Asia Pacific.

Complete Array of CRO Services

- Protocol development
- Project management
- Clinical trial monitoring
- Biostatistics
- Data management
- Pharmacovigilance
