

## **Accelerate. Advance. Achieve.** **Success in your General Medicine trial with Accelovance.**

More than 90 Sponsors have entrusted us to manage more than 200 clinical trials, either fully or for selected services, from concept development to final report. We have worked across a wide variety of therapeutic categories, including: Cardiovascular, Dermatology, Nutrition, Urology, and Women's Health.

Put our experience to work for you.

# What We Bring to the Table

## Emphasis on Planning

- Seasoned professionals with relevant scientific, therapeutic, and operational expertise who work with you throughout all stages of the trial lifecycle
- Utilization of our strong and thorough feasibility process for the pre-selection of highly-qualified sites
- A proactive approach to project planning to ensure consistent achievement of trial milestones

## Patient-Centric to Yield Results

- Preferred relationships with some of the most successful enrolling sites in the country with access to appropriate patient populations
- Creating and implementing our innovative branded recruitment strategies to elevate site performance and patient engagement
- Leveraging our expertise in sourcing and retaining treatment-naïve subjects

## Global Capability

- Utilization of our 100%-owned subsidiary in China (for region-specific or globally-integrated work)
- Leveraging the results of our proven strategic international partnerships covering 11 countries across Europe and India

## Complete Array of CRO Services

- Protocol development
- Project management
- Clinical trial monitoring
- Biostatistics
- Data management
- Pharmacovigilance
- Medical writing
- Clinical Call Center
- Regulatory affairs and IND services

**Accelerate. Advance. Achieve.**  
**Success in your next clinical trial.**
