

When choosing a CRO, the intangibles make the difference.

Any CRO can get you from Phase I clinical trials to FDA approval.

But it's the journey, rather than the destination, that should determine your selection.

ACCELOVANCE is committed to ensuring a smooth journey in the development of your compound. The Accelovance team works tirelessly as an extension of your team to optimize the timeline, conduct, budget, and quality of your clinical trial to maximize success.

Shared Passion is the Key

Our ardent commitment to your compound makes us more than responsive; we are proactive. We are big on the little things that count; attention to detail, communication, and our approach to risk sharing are unsurpassed. It's no surprise, then, that we were honored by industry leaders three of the last five years with the Best CRO award for quality of services, performance, client satisfaction, Sponsor relationships, and the overall value brought to study Sponsors. Put our expertise and experience to work for you.

What We Bring to the Table

Flexibility in Process and Study Design

- Assistance in overcoming study challenges, including protocol development, implementation of FDA guidance, comparator sourcing, etc.
- Flexibility and adaptability in structure and communication to your specific processes and study needs
- Creating and implementing our innovative branded recruitment strategies to elevate site performance and patient engagement
- Scalable support from single studies to programs

Deep Experience

- Deep therapeutic experience specifically within vaccines, oncology, and general medicine
- Skilled oversight and program management through entire clinical development lifecycle — IND Submission to NDA approval
- Seasoned professionals with relevant scientific, therapeutic, and operational expertise who work with you throughout all stages of the trial lifecycle
- Delivery of consistent, high-quality results

Complete Array of CRO Services

- Protocol development
- Project management
- Clinical trial monitoring
- Biostatistics
- Data management
- Pharmacovigilance
- Medical writing
- Clinical Call Center
- Regulatory affairs and IND services

Accelerate. Advance. Achieve.
Success in your next clinical trial.
