**MAY 2018**

**FOR IMMEDIATE RELEASE**

## **GOSAAS MIGRATES FIRST LIVE CUSTOMER OF AGILE PLM TO ORACLE CLOUD**

**WILMINGTON, DEL. – MAY 15, 2018** – GoSaaS, Inc. announced today that they have successfully migrated their first Oracle Agile PLM customer over to both Oracle Product Development Cloud (PD) and Oracle Product Data Hub Cloud (PDH).

The high technology customer was an Agile PLM adopter for more than 20 years, utilizing Agile 9.3.4 before moving to the latest release of Oracle Cloud PLM. The migration, implementation and training for this project took GoSaaS about 12 weeks to complete.

With a background of hundreds of Oracle Agile PLM and Cloud PLM implementations, the GoSaaS cloud-ready methodology that was used with this project allowed for a cohesive partnership with the customer. GoSaaS is considered as one of the first Oracle partners to complete a successful on-premises to cloud implementation.

“We are pleased not only about the success of this implementation but about how appreciative the customer has been throughout the process. The decision for the customer to go to the cloud was an easy one for them as they knew that the cloud is the future and that they wanted to get away from server usage. The GoSaaS team was eager to address concerns with the migration process and we have continued to help with any additional questions that arise,” said Hassan Ramay, Managing Partner for GoSaaS.

GoSaaS, Inc. is comprised of a highly experienced and dedicated team of 120+ industry and technology experts who have served customers within a variety of industries worldwide, making GoSaaS one of the larger Oracle Cloud consulting teams.

###

### **About GoSaaS, Inc.**

**GoSaaS** is the go-to partner for implementing SaaS (software as a service) products and solutions for Oracle PLM Cloud. As an Oracle Gold Partner, GoSaaS specializes in on-premises to cloud migrations, implementations and training for Oracle Product Development Cloud, Oracle Innovation Management Cloud, Oracle Product Data Hub and Oracle Project Portfolio Management Cloud.
