

The logo features the company name 'ChilliPharm' in a white, sans-serif font, centered within a red rectangular box. Below the name is the tagline 'Clinical image management' in a smaller, white, sans-serif font. The red box has a small triangular point at the bottom center. The background is white with faint, light gray concentric circles and dashed lines.

# ChilliPharm

Clinical image management

## Our back story

Where did we come from ?

- The ChilliBean team has been developing tools which utilize the internet to serve and share video for over 20 years
- Initially leasing 2mb lines (a bit like string and tins) because the internet could not cope with video
- We have been specialist vendors in the Broadcast and Media sector for many years
- Our entry in to the Pharma sector came via a chance encounter five years ago .....

## How we got here

Why did ChilliPharm happen?

- ..... we were asked to meet a Gene Therapy research company working in DMD
- Physiotherapists were filming patients taking part in Functional Assessments and sending the films for review on DVD – a lengthy/costly/insecure process
- ChilliVault, our media platform, made it possible to send the films easily and securely via the internet.
- From this start we have become the go to vendor in the rare disease neuro muscular space for video sharing

## Key Features

What does it do?

- Film, Log in, Upload, Add Data, Log out, Go home
- Sends notifications, allows for the creation of reports
- Facilitates Patient Reported Outcomes
- Aids in the collection of real world data
- Makes it possible for PTs to film patients and upload direct from the bespoke ChilliPharm iPad filming kit
- Is ISO27001 compliant, adheres to 21CFR Part 11/Annex 11, HIPAA and GDPR legislation

## Therapy Areas

Who uses ChilliPharm and how?

- Rare neuro-muscular disease trials
- DMD, SMA, POMPE, LAFORA, Parkinson's
- Hospital based functional assessments
- Filmed at home patient reported outcomes
- Gathering real world data
- Training films

## Next steps

What's to come ?

- New therapy areas
- Facial redaction tool
- Video to support submission
- Growth in decentralized trials
- Increase of video captured by patients at home
- Continual improvement in compliance – ISO9001, ISO13485
