## Hosting overview

- Our state of the art data centres, located in Germany, are dedicated to hosting for GxP controlled companies requiring the highest levels of compliancy, privacy and reliability.
  - Controlled according to our strict ISO compliant processes
  - We provide managed hosting services to many of the top 10 global lifesciences companies, across EDC, Safety, and other third party applications, including our own.
-

## psiXchange – automating document distribution

- No manual intervention - no impact on the recipient
  - Delivering safety documents to 1000s of sites, ECs, authorities and others using end to end automation to ensure reduced overheads and increased compliance proving our industry expertise and innovative approach.
-

# Automated Document Distribution

## Document distribution – for Safety Documents

### General challenges

- Huge and costly efforts
  - Maintaining changing reporting requirements that vary from country to country
  - Recipients may desire multiple distribution methods
  - Recipients may include ECs, Sites, RAs and others
  - Need to automatically remind, track, escalate
  - Strict regulatory environment, time critical process
  - Over reporting very common
  - No overview of compliance
  - **Historically a manual task with a lack of control**
-

## psiXchange -> Moving from Manual to Automated

### **Information**

Use existing information from multiple sources

### **Knowledge**

Identify relations, cross-validate data and link it to an action

### **Action**

Utilize the knowledge and execute the action

### **Control**

Monitor and review the automated executions – ensuring traceability and compliance

## Distribution focused on recipient's needs

- e-mail with secure link
  - fax
  - courier
  - smart portal
  - e-mail with attachment
  - With automated reminders and escalations according to your preferred process
-

## Additional use cases

- Dear Healthcare professional letters
  - Investigator brochures
  - Study start-up
- 
- In fact, any document that requires controlled distribution
-
