

JSS Medical Research Selects OmniComm Systems' TrialMaster EDC as Global Standard

Fort Lauderdale, FL, July 20, 2016 - OmniComm Systems, Inc. (OmniComm) (OTCQX: OMCM), a global leading provider of clinical data management technology, today announced the signing of a three-year agreement with JSS Medical Research, a leading global contract research organization (CRO) based in Montréal, Québec, Canada. OmniComm's [TrialMaster](#) electronic data capture (EDC) suite will be used for the collection of clinical data over a three-year term in numerous trials spanning Phase I to Phase III, post-marketing observational, patient registries, and medical device clinical studies conducted across global investigative sites.

TrialMaster was selected as JSS Medical Research's standard EDC platform replacing its legacy EDC applications. TrialMaster was chosen after a comprehensive evaluation of other leading EDC solutions. "We're very pleased to continue our longstanding relationship with OmniComm. We found the TrialMaster product to be the best overall solution for the varied needs of our global teams and our clients," said Stella Boukas, Chief Operations Officer, JSS Medical Research Inc.

Michel Bordeleau, Global Director of Information Technologies added: "The selection process involved key stakeholders in our business, from senior management to clinical operations, including data management, and OmniComm passed muster in every department."

Specific emphasis for selection was placed on:

- Ability to build studies more efficiently and effectively than its legacy systems;
- Adeptness in query management workflow;
- Intuitive interface for all key user groups;
- Ease and timeliness of data extraction into SDTM submission ready data format.

TrialMaster will be deployed within OmniComm's [OmniCloud](#)® for hosting and maintenance of the entire IT infrastructure, ensuring clinical data management technology is always running; data is secure, and product enhancements are rolled out seamlessly.

"We are truly excited about JSS Medical's decision adopt enterprise enablement with TrialMaster EDC. It was a tough evaluation run by a technology savvy group," said Kuno van der Post, SVP of business development, OmniComm Systems. "Canada and Latin America are increasingly important geographic markets for OmniComm and so, as we grow throughout all of the Americas, we will look more and more to JSS Medical Research as a valued partner."
