NOTES:

- Measured at the discharge terminal point of the compressor package in accordance with ISO 1217, Annex E; ACFM is actual cubic feet per minute at inlet conditions.
- The operating pressure at which the Capacity and Electrical Consumption were measured for this data sheet. No Load Power. In accordance with ISO 1217, Annex E, if measurement of no load power equals less than 1%, tolerance is specified in ISO 1217, Annex E, as shown in table below.
- manufacturer may state "not significant" or "0" on the test report.
- NOTE: The terms "power" and "energy" are synonymous for purposes of this document.
- Superior energy efficiency at flows below Min Capacity in leveraging Load/No load operation and air system storage.
- Iseotropic Efficiency: real performance at flow and pressure as a percent compared to an ideal compression process.
