## CheckMate for SOLIDWORKS...Why now?

If you have not upgraded to the SOLIDWORKS version of CheckMate or have not taken advantage of recent enhancements you are missing out on ***incredible productivity***

**improvements.** In CheckMate Programming you can expect **time savings by as much as 50%** with enhancements to the user interface that reduce the number of clicks required to perform many time consuming tasks. Additionally the integration of Model Based Definition (MBD) , the embedding of Product Manufacturing Information (PMI) in the 3D model, whether done in SOLIDWORKS or imported with optional translators can **further increase the time savings** by eliminating the need for 2D drawings and improving the workflow.

The change of the CheckMate platform to SOLIDWORKS is in top gear now and product advances are coming at a fast pace. We urge you check out the [Tech Tips](#) on [Resource](#) page, tune in to the Webinars and download recent ones. The [upcoming webinar on AutoMeas](#) is definitely a “don’t miss” topic.

And if that is not enough, check out our **limited time offer on CheckMate Programming**. Time is running out so don’t miss out on this exceptional opportunity to add additional seats or purchase new ones.

Take Advantage of our limited time offer!

## Upcoming Webinar: October 15, 2015

**New 'AutoMeas' in the CMBrowser** - It will fundamentally change how you program with CheckMate. It is simple to use/learn and with reduced mouse strokes and clicks, it can **reduce programming time by up to 20%**.

For use in the CMBrowser in CheckMate for SOLIDWORKS® version 14.0559

or newer.
