## **Barn Light Electric Shares Beauty, Benefits of Porcelain Enamel LED Lighting at LIGHTFAIR® International**

**TITUSVILLE, Fla. (9 April 2019)** — Barn Light Electric will join fellow lighting innovators at next month's LIGHTFAIR® International in Philadelphia. As America's sole manufacturer of porcelain enamel lighting, Barn Light Electric leads the industry in handcrafting high-quality porcelain lighting with the latest in LED technology.

Barn Light representatives plan to exhibit a number of new styles at this year's LIGHTFAIR® including the Locke Pendant, a dome-shade, deep-bowl style available in cord hung, chain hung, and stem mount.

The Locke Pendant comes in a variety of shade sizes and can be finished in different colors on the interior and exterior. Handcrafted in our Florida manufacturing facility, the Locke features the very latest in integrated LED technology which offers an average of 60,000 hours of energy-saving service.

Barn Light Electric is well known for its high-quality, American-made lighting that is easy to customize to suit most any residential style or commercial brand. With an array of finish colors, mounting styles, and other options including color temperature, lumens, and lens styles, our porcelain enamel LED lighting is both beautiful and energy efficient.
