

New 315W CMH High Performance Grow Light Systems from Growlite

Glendale, AZ – May 13, 2019 – The OG-315 High Performance Grow Light Systems from **Growlite** by **Barron Lighting Group** are designed to optimize the entire light spectrum for complete vegetative and flower production. Vertical lamp orientation combined with superior photometric performance creates a greater amount of uniform light nutrients.

The OG-315 High Performance Grow Light Systems' reflector is specifically designed for use with the **Growlite** 315W full spectrum CMH lamp, delivering better performance than traditional 600W HPS fixtures. The vertical lamp orientation provides longer lamp life, resulting in more cycles and less lumen depreciation between lamp changes.

The OG-315-8 315W CMH Vented Reflector High Performance Grow Light System features **Growlite's** patented Concealed Vacuum Airflow Technology, maintaining 100% reflective capability and improving airflow efficiency.

The OG-315-E 315W CMH Economy Open Reflector High Performance Grow Light System is ideal for open grow room applications.

"**Growlite** by **Barron Lighting Group** is thrilled to launch the OG-315 High Performance Grow Light Systems. Available in two styles, this system provides growers with a high-quality grow while decreasing their energy consumption. The OG-315-8 315W CMH Vented Reflector High Performance Grow Light System and the OG-315-E 315W CMH Economy Open Reflector High Performance Grow Light System include the all-new OG-315 reflector, the **Growlite** CMH lamp and the **Growlite** CMH ballast," said Mark Thomas, **Growlite** Sales Manager.
