Backup and Disaster Recovery

Data loss, whether from human error or a disaster, can have a catastrophic impact on your business.

Trust Corserva to Safeguard Your Business Data

Companies have relied on tape backups or other internal systems for preserving information for decades. Today, those methods are as past their prime as paper files. They're expensive and unreliable. Failures are common. Security breaches are a threat. Unfortunately, businesses often don't realize the risks they run until the damage has been done. But with Corserva Backup and Disaster Recovery, you can guard against threats with a system that will work for your business - one that's easy to manage and suits your budget and business needs.

● **BENEFITS**

— **On-Site Backup**

Our on-site backup appliance ensures that all of your valuable data and applications can be recovered immediately, should you lose a device in your local data center. All data is transmitted and stored within your network in encrypted format for maximum protection – security is our top priority.

— **On-Site Recovery**

Your on-site backup appliance contains all of the files that you will need for the recovery of a device that has failed within your network. Using available virtual resources, a new server will be created to provide the computing power. The backup appliance serves as the integrated storage device for the new virtual server.

ABOUT CORSERVA

✔ Industry Leading Managed Services Provider

✔ State-of-the-Art Operations Center with Cutting Edge Technology

✔ 24x7x365 Remote Help Desk and Onsite Support

✔ 24x7x365 Real-Time Network Monitoring

✔ Experienced, Certified Technicians and Engineers

✔ Dedicated Account Managers

✔ Predictable Monthly Cost, Scalable Level of Service

✔ Remote Resolution of Issues More Than 90% of the Time

✔ Easy to Understand Graphical Reporting of Performance

✔ Reduces IT Operational Costs by up to 70%

Off-Site Backup

Your on-site appliance is in communication with the Corserva Cloud Backup Center at pre-defined intervals, on a daily basis. In this manner, the cloud backup capability is always in sync with your local IT ecosystem. Should you suffer a catastrophic loss, you're protected.

Off-Site Recovery

In a disaster scenario, you will be comforted to know that Corserva has your IT operations back. We will provide up to seven days of IT operations at no charge, including the spinning up and running of the required computing power to launch your IT operations. We will utilize your Cloud Backup as the primary application and operating databases for your business. Once operations are resumed at your center, we will provide a fully current backup device to your site in order to rebuild your on premise IT infrastructure.

Secure, Secure, Secure

Corserva Backup and Disaster Recovery solutions are executed with the utmost security in mind. Our solutions utilize the latest in encryption technology to ensure that within your network, during transit and at rest in the Corserva Cloud Center, your data is always encrypted with keys only available to your staff. And Corserva's data centers are SSAE-16 Type II certified, the highest level of certification for physical and data security.

About Corserva

At Corserva, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
