

Solutions for Medical Practices

You Manage the Patients. We'll Take on the Tech.

Whether you're running a hospital or serve as a managing clinic administrator, you're tethered to technology. It helps manage your practice, provides access to research, improves collaborative medicine, streamlines communication with your patients, and much more. Keeping your technology up and running 24x7 is a multifaceted challenge. Medical providers don't always have the resources to own their infrastructure and keep it operating at peak performance every minute of everyday.

Corserva helps medical practices optimize the cost of buying and managing technology, from strategy and planning, to full outsourced management.

CHALLENGES

Patient Satisfaction

Today, your patients expect to interact with you anywhere, anytime. Increasingly, they don't want to call you to handle routine things, preferring instead to check test results, make appointments and find information online.

Performance and Integration

All of your equipment and software has to run perfectly, and be perfectly integrated with other components. Your primary management systems including practice management, EMR, imaging and testing systems, need be available at all times.

- ✓ Predictable Monthly Cost, Scalable Level of Service
- ✓ Remote Resolution of Issues More Than 90% of the Time
- ✓ Easy to Understand Graphical Reporting of Performance
- ✓ Reduces IT Operational Costs by up to 70%

Security

Nowhere does a data breach or data loss - whether by accident, hacker or natural disaster - have as dire a consequence as it does in medicine. It's vital that you have a tested, fail-proof backup, restore and disaster recovery strategy in place. And you must have a managed firewall solution protecting your business at all times.

Compliance

Regulations constantly change. It is imperative that your IT infrastructure be continually monitored and upgraded to ensure that it meets the most current regulations. This requirement applies to how you store, protect and transmit data.

Costs

You face three IT ecosystem costs. The first is the capital cost of owning and licensing technology. The second is the operational cost of keeping that technology running. The third is the cost that you incur when you fall out of compliance or have a data breach. Let Corserva help you to minimize your cost, and risk, through advanced technology services.

About Corserva

At Corserva, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
