

MEMBER MEETINGS & ELECTIONS

FAST, ACCURATE AND SECURE TECHNOLOGY THAT WILL STREAMLINE YOUR MEMBER MEETINGS AND ELECTIONS.

EFFICIENT

Maximize efficiency and simplify your next conference or House of Delegates meeting process with a paperless device that allows democratic microphone queuing, instant resolution and election voting. Reduce the time and number of on-site staff it takes to collate, calculate and present the results of a paper ballot or show of hands.

CLEAR & ACCURATE REPORTING

A full audit trail of identified voting activity is instantly available, enabling the entire process to undergo detailed scrutiny, affording your organization greater transparency.

INSTANTANEOUS

Real time, instantaneous results will speed up the entire voting process, no matter the size or complexity of your election protocols. This grants more time for members to interact and debate important issues.

EASY-TO-USE

Lumi offers a user friendly device that provides attendees with on screen feedback. The system uses state of the art voting keypads to capture delegates' votes and instantly display the results, giving delegates the best opportunity to express their views on key issues. A microphone built into the keypad along with our queuing software also provides a platform for delegates to join a line and to speak in turn.

SCALABLE & SECURE

Whether you are having a 10 person board meeting or a 10,000 person national election, Lumi's Member Meeting & Election Solution is your answer for any size meeting or event. Our unique, encrypted technology has been proven 100% secure and accurate.

MEMBER MEETINGS & ELECTIONS

1. REGISTRATION

A smartcard is issued to each meeting attendee containing a reference number or their name. No confidential information is stored on the card, so if it is lost, it can easily be replaced. This method of registration allows attendance to be tracked easily, affording greater accountability.

2. RESOLUTION VOTING

The keypad provides immediate on-screen feedback giving voters the security of knowing their vote has been counted. Results can then be displayed instantly on the screen with the option of showing abstentions.

3. ELECTIONS

The system is customizable to meet your organization's protocols and can easily accommodate complex election requirements for large or small organizations. Voting privileges can be given to specific individuals dependant on election criteria and occur simultaneously at remote sites.

4. MANAGE AUDIENCE

Every keypad contains a microphone. Our microphone queuing solution indicates the participants who want to speak (and if desired, whether they are 'for' or 'against' the motion) putting the chairperson firmly in control and thus maximizing debate time. In order to be fair and democratic, the queue is accessible to everyone and can be operated on a first-come, first-served basis.

5. REPORTS & AUDITING

Various reports and an audit trail are produced automatically, giving a full and transparent record of the event.

6. SURVEY & ANALYSIS

Give your members a chance to communicate views and opinions, without peer pressure, via voting and texting.
