

You may be spending millions on your IT infrastructure that you could be saving.

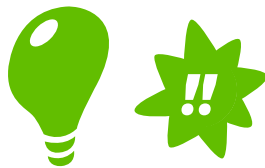

Optimize the capacity and performance of your Microsoft SQL Server platform.

Gain even 50% savings in license, hardware and service costs and get a platform that is easy to manage.

More accurate, faster and easier optimization than with manual effort.

SQL Governor's innovative capacity optimization is based on patent pending methods.

Data centers around the world invest massively in IT infrastructure, software and hardware. Major savings and strong competitive edge could be achieved if capacity would be used optimally.

The database platform environments have lacked effective automatic tools to materialize optimization savings.

SQL Governor is a revolutionary software product for planning smarter hardware utilization of large SQL Server platforms.
