

## What's Hiding on Your Network?

### Check Point 3D Security Analysis Report and Data Loss Prevention Risk Assessment

Do you know which **high risk web 2.0 applications** are being used in your organisation? Which **intrusion exploits** your organisation is exposed to? What **sensitive data** is being sent outside your organisation?

**Let Check Point find the answers for you!**

Our experts analyse your network and provide a comprehensive security analysis report – exposing security risks and suggesting remediation.

- All security threats in one single report (High risk application and web sites, intrusions attempts, sensitive data loss, bandwidth hogging and more)
- Easy-to-read graphical reports
- No risk to your network environment

The Check Point easy to read, graphical reports don't require you to be a security expert or have deep technical knowledge.
