

LED Light Strip

Mood lighting

Enhance the mood in your sauna by installing our specially-produced LED Light Strip. This light strip is ideal for environments where you want milder and more soothing lighting that can be freely adjusted to your preferred level of brightness.

The compact dimensions of this light strip mean that it can be positioned more or less anywhere in your sauna or steam bath. For example, by putting it behind the backrest or under the benches, you can achieve an indirect and atmospheric lighting effect similar to that experienced in professional spas and saunas. Installation is easy – there is a clever snap-in bracket made of aluminium. The light strip itself is made of polycarbonate, which is specially produced to cope with challenging environments. The LED Light Strip is IP65 rated and is therefore highly suitable for use in wet environments.

Model	Length	Output	Art. no.
LED Light Strip	38 cm	12V/DC	9001 1350
LED Light Strip	50 cm	12V/DC	9001 1352
