

HELO ROCHER

HELO ROCHER

LEAVING NO-ONE COLD

The new Helo Rocher holds a massive 100 kg of sauna stones in a robust brushed steel brazier. Heat radiates smoothly in every direction. The secret of the soft and relaxing steam is the full-length heating elements. Every stone is heated, top to bottom, and the greater stone surface area turns a ladle of water into gentle invigorating steam. The artfully designed steel frame completes the impressive tower of natural stone as a centerpiece of any sauna.

The Helo Rocher heater is ideal for creative interior design. It can be installed freestanding in a corner or against a wall, or embedded into a raised floor using a glass or soapstone collar. This also enables lighting from underneath.

Helo Rocher heaters are suitable for saunas with a capacity of 5-15 m³, with a minimum height of 1 900 mm. The Rocher is 425 mm in diameter and 1 100 mm high. Minimum safe distance to a wall or bench is only 60 mm.

Helo Rocher has a built-in electronic motherboard so you can choose between several touchpad controller options: Helo Easy, Helo Midi, Helo Digi I or Helo Digi II.

TYPE	POWER (kW)	SAUNA SIZE (m ³)
HELO ROCHER 70 DE	6.8	5.0-9.0
HELO ROCHER 105 DE	10.5	9.0-15.0
