

# Tylö essential oils.

## Experience the bath with new senses.

With Tylö essential oils, you can easily enhance your sauna bathing and get a whole new experience. A few drops of essential oil fragrance in a ladle of water poured over the hot sauna stones turns your sauna bath into an experience that stimulates every sense in your body, not least the sense of smell. Fragrance oil is just as easy to use in your steam bath. The oils come in a variety of scents for you to choose the fragrance that suits you best, while the variation can be great for those who wish. The essential oils are extracted directly from the different herbs, plants and fruits that give rise to the scents. Tylö essential oils are essential oil in its purest form, that is 100%.
